Kay,

I will stop by on Monday and I would like to visit with you about these questions. I apologize that it is not correctly done. I went over it with Nick so that it would be complete - guess we missed these.

We are putting in a well and pump. The water will be pumped into a ditch or piped up to the upper field. When onions are planted there will be a drip station using this water.

As far as the depth. It could be any where from 75 to 250 ft deep. (is this what you are needing?)

See you on Monday.

Thanks, again.

Debbie:

I have been assigned review of your application for water right permit. Item 6 on the form was not completed. Please advise us what the proposed diverted works will consist of (i.e. well, pump & sprinklers or well, pump & ditches). The application form is not considered acceptable until all items are completed. If you have a copy of the application form you can complete item 6 and send that page to me, or if you will just send me the information I can type up another form for your signature and we will be able to proceed with processing. Thank you for your attention to this matter. If you have any questions regarding this, please don't hesitate to contact our office.
