RE: Draft Transfer Application

Dear Mr. Cox:

Thank you for driving to Idaho Falls (twice) to meet with me to discuss adding a new well to your two ground water rights. Enclosed is a draft transfer application for you to review. Consistent with your instructions, this transfer will rearrange and combine the irrigation place of use for the two ground water rights to cover the ground currently irrigated with the rights. The rights in combination allow for 156.5 irrigated acres. The proposed place of use is highlighted in blue on the enclosed map. The transfer also changes the water rights to list three authorized points of diversion: the two existing wells and a new well to be completed just to the north of your diesel pump.

The total filing fee will be \$740. This is based on the total amount of water being transferred. In this case, the full amounts of the water rights (3.13 cfs) are involved in the transfer because you are adding a new ground water well to the system.

If the transfer application correctly describes the changes you would like to make to your water rights, please sign the application and return the signature page and filing fee (check made out to IDWR) to our office. Feel free to keep the draft copy of the application for your records. We will begin processing the transfer as soon as it arrives. Thanks for your help.

Sincerely,

James Cefalo
