RE: WSB and Transfer Activity

In 2005, water right 61-2165 was fully leased to the water supply bank. The decreed water right was worth:

314 acres 5.03 cfs 1413 af

In 2012, water right 61-2165 was rented through 2016 for the following amounts:

253.3 acres 4.06 cfs 1139.9 af

In October of 2013, water right 61-2165 was transferred and split as follows:

Remaining portion of 61-2165

59 acres 1.16 cfs 339 af

Split portion 61-12291

200 acres 3.20 cfs 900 af Irrigation purposes

0.67 cfs 174 af Industrial purposes

200 acres 3.87 cfs 1074 af

Because water right 61-2165 was leased prior to the transfer, the rental will be modified to reflect the following:

Portion of 61-2165 rented:

59 acres 1.16 cfs 339 af

Portion of 61-12291 rented:

194.3 acres 2.90 cfs 800.9 af

A letter will be sent to the applicant to see what they would like to do with the portion of water right 61-12291 that is not leased to the bank which equals:

5.7 acres 0.30 cfs 99.1 af Irrigation purposes

0.67 cfs 174 af Industrial purposes

5.7 acres 0.97 cfs 273.1 af
