From: Craig L. Saxton

Re: Issuing License 95-16518

I received a call from Gloria LeKander on March 4, 2014 (509.624.9088). She called to check on the status of licensing permit 95-16518. The last documentation I had in the file was that we were going to move forward with making the changes as described in my January 8, 2014 e-mail. As of 3/5/14, the changes had not been made.

I went ahead and updated the place of use shape on license 95-8735 to more accurately show the 4 lots that the license is applicable to. Gloria LeKander, Secretary of Eagle Crest Water Users Association identified the place of use for 95-8735 as lots A-D in the Jarvis Tracks 1st Addition. But the A-D identification is hand written on a portion of the plat map. According to taxlot data, the POU is described as Parcel #s 0-4080-000-001-0 (JARVIS TRACTS, Lt 1), 0-4080-000-002-A (JARVIS TRACTS, TX#15767 In TRACTS 2&3), 0-4080-000-003-A (JARVIS TRACTS, TX#15237 IN LTS 3&4), and 0-4080-000-004-A (JARVIS TRACTS, TAX#19336 IN LTS 4&5). No elements on the license were changed. All I changed was the shapefile.

Because the licensed POU was updated, I updated the recommended POU to match License 95-8735 (csaxton 3-5-14). No elements on the recommendation were changed. All I changed was the shapefile.

By fixing the POU for License 95-8735, I can move forward and issue the license for 95-16518 with the POU described as Lot 32 as intended in the application.
