
MEMORANDUM

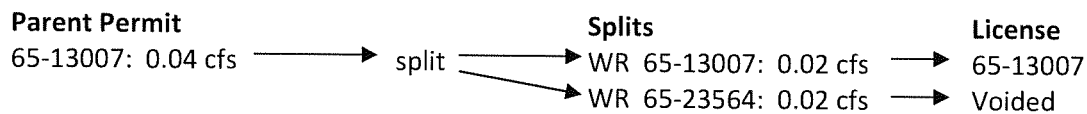

Date: March 7, 2014

To: File 65-23564 and 65-13007

From: Craig L. Saxton

RE: Water Right Record 65-23564 (split of 65-13007)

65-13007 was permitted for use of one spring. The field exam found two springs were developed that were not interconnected. To resolve this issue 65-13007 was “split” with the intent of issuing one license for each spring. The original number 65-13007 was retained. The original permitted rate for 65-13007 was reduced from 0.04 to 0.02 cfs, and was licensed for one of the two springs. Water Right Record 65-23564 was created as a child or split portion of 65-13007. It appears to have been created by splitting permit 65-13007 directly into a water right record and therefore no permit record was created for 65-23564.

However, 65-23564 required an amendment to allow the department to issue a license. The permit holder never submitted an amendment so the department voided 65-23564. The void order references voiding permit 65-23564 which was never created. When the void order is referencing 65-23564, it is really meaning that it is voiding that portion of 65-13007 which is represented by water right record 65-23564.

The status of the water right record 65-23564 is set as “See Remarks” rather than “Voided”.
