**I.
FINDINGS AND CONCLUSIONS**

Partial Decrees for the above-captioned water rights were issued on May 20, 2009. On March 20, 2013, West Indian Cove Canal Company filed a *Motion to Set Aside Partial Decree* in the above-captioned subcases. On that same date, the Court entered an *Order* referring the matter to the Special Master. On January 22, 2014, the Special Master issued a *Special Master's Report and Recommendation*, recommending that the *Motion to Set Aside Partial Decree* be granted, and that *Amended Partial Decrees* be issued with the elements set forth in the attached *Special Master Recommendation for Amended Partial Decrees*. No challenges were filed to the *Special Master's Report and Recommendation*, and the time for filing challenges has expired.

Pursuant to I.R.C.P. 53(e)(2) and *SRBA Administrative Order 1*, Section 13f, this Court has reviewed the Findings of Fact and Conclusions of Law contained in the *Special Master's Report and Recommendation* and wholly adopts them as its own.

The above-captioned water rights are for an irrigation purpose of use and satisfy one of the following statutory criteria: (1) used in conjunction with an irrigation project where the canals constructed cover an area of twenty-five thousand (25,000) acres or more; (2) the place

of use for the water right is located within an irrigation district organized pursuant to the laws of the state of Idaho; or (3) the water right is for an irrigation project developed by an association, company, corporation or the United States to divert and deliver or distribute surface water under any annual charge or rental for beneficial use by more than five (5) water users in an area less than twenty-five thousand (25,000) acres.

Effective July 1, 2002, the Idaho Legislature approved the use of a Geographic Information System (GIS) for describing the place of use (digital boundary) for water rights meeting the above-stated criteria. See I.C. §§ 42-219(2)(2003) and 42-1411(2)(h)(2003). The GIS mapping technology allows the geographic area encompassing the place of use for a water right to be particularly identified and visually displayed in a map overlay format through the aid of computer technology. In incorporating a digital boundary into a partial decree, the electronic or digital data is what is actually decreed as opposed to the visually displayed map ultimately generated from the data. The data is stored on a CD-ROM. The Court finds that the GIS mapping technology maintained by IDWR complies with the standards for spatial accuracy set forth in I.C. § 42-202B (2)(2003). See *Notice of Filing Affidavit of Michael Ciscell Re: Digital Boundary, filed October 17, 2003*.

II. ORDER

1. IT IS ORDERED that the *Partial Decrees* previously entered for the above-captioned water rights are **hereby set aside**.
2. IT IS FURTHER ORDERED that the above-captioned water rights be **decreed** with the elements set forth in the attached *Amended Partial Decrees Pursuant to I.R.C.P. 54(b)*.
3. IT IS FURTHER HEREBY ORDERED that the data comprising the digital boundary shall be stored on a CD-ROM medium, which shall be issued in duplicate original. The SRBA District Court will retain one original together with the original *Partial Decrees*, and IDWR will retain the other original. The map depicting the place of use attached to the *Partial Decrees* is intended for illustrative purposes only.
4. IT IS FURTHER HEREBY ORDERED that upon request, the claimant can obtain a copy of the CD-ROM from IDWR at no cost, although GIS software will still be required to access the data. Subsequent administrative changes to the place of use

shall also be stored in a digital format and kept on file and maintained by IDWR. IDWR shall maintain all computer software and/or hardware necessary for reducing the data to a usable format that is accessible to the general public, including access through the IDWR Internet website (www.idwr.state.id.us) or its successor Uniform Resource Locator (URL).
