DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

05-23557

WATER RESOURCES
WESTERN REGION

1. Name of applicant(s) David V. & Anonglak Jones Phone 215-942-4139
Name connector (check one) ☒ and ☐ or ☐ and/or

Mailing address 1111 Stump Road City Feasterville
State PA Zip 19053 Email dvernonjones@verizon.net

2. Source of water supply Spring which is a tributary of Porter Creek

3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	¼	¼	¼	County	Source	Local name or tag #
7N	3E	8		NE	SW	NW	Boise	Spring	

4. Water will be used for the following purposes:

Amount 0.04 cfs for Domestic purposes from 01/01 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)

Amount 0.02 cfs for Stock Water purposes from 01/01 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

5. Total quantity to be appropriated is (a) 0.04 cubic feet per second (cfs) and/or (b) _____ acre feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. 36" x 5' section of vertical PVC pipe filled with gravel to pool water at spring. Solar powered 75W pump to transfer water in 1-inch PVC line to 200-gallon cistern.

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☒ No

c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.

d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No

e. If well is already drilled, when? _____; drilling firm _____
well was drilled for (well owner) _____; Drilling Permit No. _____

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower; show total feet of head and proposed capacity in kW. _____

b. Stockwatering; list number and kind of livestock. 12- 15 head of beef stock

c. Municipal; complete and attach the Municipal Water Right Application Checklist.

d. Domestic; show number of households 1

e. Other; describe fully. _____

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
7N	3E	8							D										
7N	3E	8							S										

Total number of acres to be irrigated: _____

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping?

10. a. Who owns the property at the point of diversion? David V. & Anonglak Jones
- b. Who owns the land to be irrigated or place of use? David V. & Anonglak Jones
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing:

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary.

I have two proposed uses of the spring water on this land, a) To provide water for domestic use for a fifth-wheel RV. Water will be pumped from cistern to a water storage tank, b) To provide water for cattle that will be kept there during the spring and early summer months. I will sink a 36-inch pipe vertically into the ground at a spring location on my property and use a solar powered pump to convey spring water from the 200-gallon cistern to a water storage tank for domestic use, and watering troughs for the cattle.

12. Time required for completion of works and application of water to proposed beneficial use is 2.0 years (minimum 1 year).
13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

RE: Application for Permit No. 65-23557 — JONES.

Dear Watermaster:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right application. A copy of the application is enclosed for your reference. Please review the application, complete the enclosed recommendation form, and submit your reply, if any, to this office by March 24, 2014.

IDWR will assume you do not object to this application if a timely response is not received. Please contact me if you have any questions in this matter. Thank you for your help.

Sincerely,

Rachel Sommer

Re: Water Right Application for Permit No. 65-23557

Dear Mr. & Mrs. Jones:

I am currently reviewing your water right application for permit to divert water from two (2) springs for domestic use for two (2) homes and stock water for 15 head of cattle. There are some issues and questions that will need to be addressed in order to complete our review.

It appears from your description that you are proposing two separate water supply systems. One system is to divert spring water for domestic external use for irrigating garden areas around the two homes. The second system is to divert spring water from an additional spring to fill watering troughs for 15 head of cattle. If you wish to have two separate water systems, you will need to file an additional application for permit for one of the beneficial uses. If the systems were connected with a common cistern for pumping, this would be considered one system, even though water diverted from the cistern would be beneficially used for different uses.

Since you are proposing two (2) homes to be served by a spring, domestic use will be allowed for internal use only. A beneficial use for irrigation would need to be added to your application for irrigation of the garden areas. If the spring was to serve only one (1) home, domestic use would include internal use and irrigation of up to ½ acre of lawn, landscaping, and gardens.

Your property is located within Porter Creek Water District 65B. This water district has had many water right conflict issues in the past. New applications for internal domestic use and stock water will likely be okay. However, based on past experience, yard and garden irrigation will likely be a problem. Water has not been available beyond the normal snow melt runoff period for viable irrigation. The normal snow melt runoff period generally ends around June 15. The watermaster for Porter Creek Water District 65B may impose a 6/15 curtailment for limited approval irrigation. If you can accept your irrigation to be curtailed each year on 6/15, then you could add a beneficial use for irrigation to your application for permit.

If the curtailment of irrigation water is not acceptable to you, it would be recommended to delete the irrigation of the garden areas from your application for permit. Another option would be to drill a domestic well to serve both homes. By drilling a well to serve both homes under a single ownership, you will be allowed to irrigate up to ½ acre of lawn, landscaping, and gardens.

without needing a water right. If each home will be separate ownership and the total irrigable area is greater than ½ acre, you could file for a new water right from the well. Since your site is near Porter Creek, it is assumed that shallow ground water is tributary to Porter Creek. Therefore, a proposed well would need to be drilled below the nearest confining layer to prevent pumping from the shallow ground water source.

Application Modifications:

Item No.2: The source of the water are springs, not ground water.

Item No.3: The source of water are springs, not ground water. A Department requirement is that the location of all springs be described to the nearest 10 acres. One spring would be described as NE1/4SW1/4NW1/4. The second spring would be NW1/4SW1/4NW1/4. Also, since the location of each spring is different, you need to indicate to points of diversion.

Item No.8: The place of use is described incorrectly for domestic and stock water. Both domestic and stock water uses are located in the SW1/4NW1/4 of Section 8, T.7N R.3E. If irrigation is to be deleted from the application, remove the total number of 0.5 acres to be irrigated. If you wish to pursue an irrigation beneficial use, irrigation will need to be added to Item No.4.

Item No.13: Attached please find an aerial photo for your use. Please label the locations of the springs (POD's – Point of Diversions), and the homes and watering troughs (POU's – Places of Use).

I apologize for the information overload, but I hope by providing the water right issues related to the Porter Creek Water District 65B, and options related to your water right application for permit, that you will be able to make an informative decision on how to proceed with your application.

If it is your desire to continue to process your application, please submit your written response and an Amended Application for Permit within the next sixty (60) days. This application will be voided without a timely reply. Refunds are not available for voided applications.

A copy of your application is enclosed for your convenience. IDWR forms and other information are available on the IDWR's web page at www.idwr.idaho.gov. Please contact me at 208-334-2190, or by e-mail at rick.collingwood@idwr.idaho.gov if you have any questions. Thank you for your attention to this matter.

Sincerely,

Rick Collingwood, P.E.
Water Resource Agent, Sr.

Subject: Fw: Application # 65-23557
Attachments: Zimmer Lane.JPG

Hi Rick,

Good to talk to you today. As stated on the phone my intention is to develop the spring shown in the aerial shot for the following purpose:

- 1) Feed a cistern and watering trough for 12-15 head of stock.
- 2) Feed a storage tank for the 33 foot 5th wheel shown on the aerial photo.

The long term plan is to build two houses and drill two wells for the houses, they would not be irrigated from the spring.

Thanks!

Dave Jones

Hi Rick,

See my comments below:

From: Collingwood, Rick
Sent: Monday, February 03, 2014 2:21 PM
To: dvernonjones@verizon.net
Subject: Water Right Application 65-23557
Dave,

Thank you for the information and update for your proposed water system and beneficial uses per your Application for Permit No. 65-23557. However, your e-mail correspondence dated January 31, 2014, did not address all of the issues in our January 8, 2014 letter. I have summarized the outstanding issues below. Please respond to each and e-mail them to me. We need to have written documentation addressing the outstanding issues prior to proceeding with your application.

1. Latest proposal is to develop one spring, divert water to a cistern, and pump water to a storage tank for domestic use and to watering troughs for 12 – 15 head of cattle.
2. Yes this is the plan as you have outlined.
3. No homes to be constructed at this time. Domestic use will be internal use only for one (1) fifth-wheel RV.
4. Homes will be constructed at a later date. Water for the homes will be supplied by well. The 5th wheel will be fed from a storage tank that will be supplied by the spring.
5. Irrigation of garden areas and lawn and landscaping is not included for this application. Due to the may past water right conflicts within the Porter Creek Water District 65B, it is likely that any proposed consumptive use, such as irrigation, will be protested. It is likely that all irrigation use may be restricted to a 6/15 cutoff date each year.
6. There is no plan to plant grass around the 5th wheel so no irrigation is required. This is purely water for cattle and for domestic use.

Also, in a separate e-mail, I am going to forward to you an 'Amended Application for Permit' for your signature. Since you are located in Pennsylvania, preparing an amended application to address the required modifications will be the easiest and quickest way to proceed with the review of your application.

If you have any questions, please let me know.

Thanks,

Rick Collingwood, P.E.
Water Resource Agent, Sr.
