WATER RIGHTS ANALYSIS

Dearborne Farm Transfer Narrative

The purpose of this transfer is to:

- 1) Describe an 850-acre place of use reflecting an existing integrated irrigation system;
- 2) Clarify existing ground water diversions and locations;
- 3) Separate a supplemental portion (27 acres) of water right 63-7876 to remain unchanged and transfer remaining right to integrated system;
- 4) Add a new point of diversion (well); and
- 5) Change ownership of water rights currently in the name of DBSI Tiegs 979, LLC to SunRidge Dairy, LLC.

Accounting for overlaps, the Dearborne Farm water rights 63-2896, 63-3043, 63-3255, 63-3274, 63-3486, 63-7876, 63-31476, 63-33543, 63-33544, 63-33546 and 63-33547 currently authorize irrigation of 877 acres. Of this total, 850 acres are above (south) of the Mora Canal and 27 acres are below (north) of the Mora Canal. Since the 27 acres below Mora Canal receive supplemental ground water from right 63-7876 and surface water from Boise-Kuna Irrigation District, these acres are not proposed for change as indicated in Table 1b. Only ground water appurtenant to lands above Mora Canal that do not receive surface water are proposed for change.

The water rights currently authorize diversion from a total of 12 existing wells. Only nine of those wells are proposed for the integrated system. Three wells decreed to Water Right 63-31476 are not included because they serve a separate system and acres under water rights 63-3134B and 63-3275B appurtenant to the Stagecoach and Rim farm.

In aggregate, the transfer rights provide 0.018 cfs/acre over the entire integrated place of use (Table 1). This represents no increase in diversion rate or volume over that which is currently authorized under existing rights.

Subject: Applications for Transfer (3); Application for Permit

Dear Steve,

Enclosed on behalf of SunRidge Dairy LLC (SunRidge) are three *Applications for Transfer* for three SunRidge properties, referred to herein as (1) Dearborne Farm, (2) Rosti Farm and (3) Original SunRidge/SunRidge Dairy Farm. The general purpose of these transfers is to amend existing water rights to reflect current irrigation systems. Also enclosed is an *Application for Permit* for an irrigation storage pond that serves a place of use known as the Stagecoach and Rim Farm. A brief summary of each application is provided below.

Rosti Transfer: Snake River water rights 2-10218 and 2-10220 are currently appurtenant to the 428-acre Rosti Farm property. Although SunRidge is listed as the current owner of these rights, SunRidge only owns 422 acres of the 428-acre place of use listed under these rights. Furthermore, SunRidge is currently irrigating 428 acres on the Rosti Farm, although 6 currently-irrigated acres are not covered by existing water rights 2-10218 and 2-10220). To remedy this discrepancy, portions of water rights 2-2194A and 2-10185, currently appurtenant to the Original SunRidge/SunRidge Dairy Farm described below, have been proposed for transfer to the Rosti Farm. All the rights proposed for transfer (water rights 2-10218, 2-10220, 2-2194A, and 2-10185) are diverted from the same point of diversion on the Snake River.

Specifically, this transfer proposes to do the following:

- 1) Describe a revised 428-acre place of use that reflects a currently-integrated irrigation system on land owned by SunRidge;
- 2) Clarify the applicant's portion of the 422-acre portion of water rights 2-10218 and 2-10220; and
- 3) Transfer primary Snake River water from rights 2-10185 and 2-2194A to allow irrigation of 6 additional acres at the Rosti Farm.

Original SunRidge/SunRidge Dairy Farm Transfer: The purpose of this transfer is to

- 1) Correct the commercial/stockwater place of use under Decreed Right 63-3135 to accurately reflect developed area;
- 2) Describe a 701-acre place of use that reflects an existing integrated irrigation system;
- 3) Clarify the ground water diversions authorized under water right 63-31477;
- 4) Split water right 2-10185 to allow 6.5 acres of primary surface water to be transferred to the Rosti Farm property;
- 5) Split water right 2-2194A to allow 5.0 acres of primary surface water to be transferred to the Rosti Farm property; and
- 6) Consolidate the remaining 325.2 acres of primary surface water onto 227.5 acres, resulting in an increased per-acre diversion rate.

Dearborne Transfer: The purpose of this transfer is to:

- 1) Describe an 850-acre place of use reflecting an existing integrated irrigation system;
- 2) Clarify existing ground water diversions and locations;
- 3) Describe a 27-acre portion of water right 63-7876 to remain unchanged as a supplemental source of supply, and transfer remaining right to the integrated place of use;
- 4) Add a new point of diversion (well); and
- 5) Change ownership of water rights currently in the name of DBSI Tiegs 979, LLC to SunRidge Dairy, LLC.

In aggregate, this transfer will provide maximum diversion rate of 0.018 cfs/acre over the entire integrated place of use. This represents no increase in diversion rate or volume over that which is currently authorized under existing rights.

Rabo Finance has a mortgage on the DearbornE Farm. Transfer authorization from Rabo Finance has been provided. NW Farm Credit Services has a mortgage on the Rosti and Original SunRidge/SunRidge Dairy Farms. Transfer authorization from NW Farm Credit Services will be provided upon receipt.

Stagecoach and Rim Application for Permit: An irrigation pond located in Section 7, Township 1N, Range 2W, has existed since at least 1964 (as indicated in the licensing field exam conducted by the Department for water right 63-3134). The system capacity of the well used to fill the pond was measured at 3.26 cfs during that exam; the size of the pond is approximately 70 acre-feet and cannot be filled in less than 24 hours from the well. As a result, a new application for permit seeks authorization for storage and use of irrigation water, including annual evaporative losses.
