TO: File 43-13680

FROM: Jean Hersley

RE: Condition Requiring Lockable Device

While trying to do an in-house review to license water permit 43-13680, it was determined that we needed pictures of the lockable device required by a condition on the permit. After two requests, the Department wasn't given any information. Craig didn't want to void the permit because we aren't sure there **isn't** a lockable device installed. I contacted Allen Merritt at Southern Region and he informed me it is on Bill Mill's list of exams to complete. Attached is the email correspondence with Allen. I will let Bill handle it from this point.

Subject: RE: Water permit 43-13680

Bill actually had it on his list to do. He has been in contact with Mr. Wickel and will plan on completing the exam.

Subject: Water permit 43-13680

Allen,

I was trying to do an in-house review to license water right 43-13680. It is a stockwater right from an unnamed spring tributary to Cassia Creek.

There is a condition on the permit requiring the installation of a lockable device. I have written two letters to try and get pictures from Mr. Wickel and as of today, I haven't heard anything.

Craig doesn't want to void this because we aren't sure there isn't a lockable device installed and was wondering if you could add it to your list of field exams to be done.

Please let me know.

If you have any questions, you can call me (208) 287-4942 or Craig (208) 287-4916.

Thank you.
