

MEMORANDUM

Date: February 24, 2014
To: Water Right File 37-8916
From: amerritt
Re: review and approval

This application for permit was processed in the region. It was originally filed by Monroe and protested. The application was assigned to Norris and amended. The amendment was advertised without additional protests. The original protests were withdrawn. The watermaster has reviewed and does not oppose approval. It is being approved out of the region as drafted with standard conditions. Note that the approval is based on approval of right 37-22847 to mitigate ongoing evaporative losses for the pond enlargement. The applicant proposed to rent water for the one time fill of the pond. Note that the application as amended requested volume for the addition as well as the existing historic pond. The SO opted to limit approval to the enlargement only but described the limit of the existing pond in comments.
