RE: WATER SUPPLY BANK LEASE CONTRACT FOR RIGHTS 45-13998 and 45-14000

Water Rights 45-13998 and 45-14000 were leased into the Water Supply Bank on December 31, 2013 in accordance with the executed original Lease Contract enclosed. **Your water rights as described on the Lease Contract are considered leased into the Bank and should remain unused until they are formally released from the Bank.**

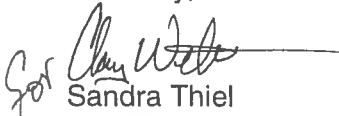

The rights will automatically be released from the Bank on **December 31, 2015**, unless the rights are released earlier by the Board, or upon your request. **Please note your rights may not be available for immediate release if they have been rented.** To release the right from the Bank prior to the release date, submit a written request on the *Request to Release a Water Right from the Bank* form. This form is available from our public website at www.idwr.idaho.gov.

RE: APPLICATION(S) TO LEASE WATER RIGHT(S) 45-13998 and 45-14000 TO THE WATER SUPPLY BANK

******TIME SENSITIVE RESPONSE REQUIRED******

Dear Applicant:

The Department of Water Resources has completed its review of your application to lease the above-mentioned water right to the Water Supply Bank. **I have enclosed two original Water Supply Bank Lease Contracts for your review and signature. Please sign and return BOTH Lease Contracts within 14 days.** Upon signature and return of the contracts, the Department will also sign the original contracts and return an executed copy to you. The Lease Contract is not considered final until you and the Department have both signed.

The rights will automatically be released from the Bank on **December 31, 2015**, unless the rights are released earlier by the Board, or upon your request. To release the right from the Bank prior to the release date, submit a written request on the Request to Release a Water Right from the Bank form. To propose a new lease period, submit a new Application to Sell or Lease a Water Right to the Water Supply Bank form along with applicable fees to the Department. These forms are available from any IDWR office or from our public website at <http://www.idwr.idaho.gov>. Please note your rights may not be available for immediate release if they have been rented.

Please review the conditions of acceptance listed on the Lease Contract, including #3 which says:

"While a right is in the bank, **the lessor may not use the right** without approval of the department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B."

These rights were involved in a transfer in 2006 that converted irrigation to stockwater and commercial beneficial uses. The condition *The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval* was part of the transfer approval. It appears that the facility was not developed. When the water right is eventually released from the bank you will need to either use the water immediately or file an "Extension to Complete Transfer"

Re: Review of Application to Lease a Water Right from the State Water Supply Bank

PURPOSE/NARRATIVE: On December 4, 2013 the Department received a *Request to Release or Lease Term Extension Form* from Pickett Ranch & Sheep Co. Both rights were originally leased into the bank December 19, 2007. Pickett Ranch filed an extension in December 2011. The current lease expired December 31, 2013.

AUTHORITY TO FILE: The applicants own both water rights and the property at the place of use. According to the Idaho Secretary of State David Pickett is the registered agent for the Pickett Ranch and Sheep Co (see attachment).

WATER RIGHT VALIDITY: Both rights were partially decreed in the SRBA on May 13, 2005. They have been leased into the bank since December 2007, less than two years after the partial decrees, so forfeiture is not an issue.

These rights were involved in a transfer. According to the conditions of the transfer the right holder was to have accomplished the change within one year. It appears they did not use the water according to the conditions of the transfer. When the rights are removed from the Bank they will have to use them immediately or the right holder must file an *Extension to Complete the Transfer*.

INJURY TO OTHER WATER RIGHTS: No injury is apparent.

ENLARGEMENT OF USE: Rights 45-13998 and 45-14000 are stacked and there does not appear to be a risk of enlargement provided the rental analysis is done appropriately.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest. The points of diversion and place of use are within the Oakley Fan Critical Ground Water Management Area, the Eastern Snake River Plain Moratorium Area, and the Trust Water Area.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:
The leases appear to be consistent with conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:
The water master for water district 140 responded that he has no objections to extending the lease (see attachment).

There was some concern about the whether these rights were part of a mitigation plan. According to Tim Luke migration plans in Basin 45 are limited to irrigation rights only.

These rights are for commercial/stockwater purposes as per a transfer approved in 2006. The mitigation plans/activities in Basin 45 are limited to irrigation rights only so these two would not be involved in any mitigation.

Good Morning Tim, We have receive applications to lease (extend existing leases) rights 45-13998 and 45-14000 into the water supply bank. We solicit comments from the regions and Cindy Yenter said that you have a spread sheet for the idled acres. Can you tell me if these rights have been included in a mitigation plan?

If the rights are associated with any plan it would be either the Southwest / Goose Creek ID plan for the SWC call. Tim has a spreadsheet which lists all the idled acres. It would be a good idea to check and make sure these acres have not been included in a mitigation plan. If they have, they should NOT be in the bank.

Sandra,
I believe these rights were involved in transfer #72692 in 2006 that converted irrigation to stock/commercial for a dairy or feedlot and they had a year to complete transfer. It does not appear the facility was ever developed but they did put the rights in the Bank so probably are protected. It appears they will need to file for an "Extension to Complete Transfer" when they pull the rights out of the Bank. I'm not sure if they would have more than 1 year to develop the transfer after they pull them out. We might need to discuss with Pam. I'm not sure if the dried up acres are in anyway associated with a mitigation plan but might need to check with Cindy.

Otherwise I do not have an issue.

Hello Brian, We received an application to extend the water supply bank lease for 2 water rights, 45-13998 and 45-14000. Both have been leased into the bank since 2007. They are owned by Pickett Ranch & Sheep Co. near Oakley. Both rights are for commercial and sockwater and have a combined diversion rate of 1.04 cfs. I have attached a map showing the location of the place of use and points of diversion for both rights. They would like to extend the lease through December 2015. Would you please let me know if you have any objection to the lease extension by Wednesday, February 19th? Thanks.
