Re: Application for Permit No. 67-15100

Dear Applicant:

You filed an application for a new water right from a regulated source within the Weiser River Water District. Regulated sources include tributary surface water and tributary shallow ground water (ground water above the first confining layer in the aquifer). If approved, your application would be a junior water right.

The Weiser River Watermaster regularly curtails junior water rights by June 15 each year. This is necessary under Idaho law to protect senior water rights when the water supply is not adequate to fill all rights at the same time. This means your application, if approved, would include a condition of approval automatically curtailing your new use by June 15 of each year. This condition of approval balances protection of senior water rights with promotion of the maximum economic benefit of water resources.

Note the June 15 cut-off date mentioned above would most likely be a best-case scenario, or good water year for your proposed permit given local knowledge of the lower end of Monroe Creek. In most years your right, if approved, will likely be undeliverable.

To determine if you want to proceed with your application based on the above explanation, please complete and return the enclosed questionnaire. Your written reply must be received within the next thirty (30) days. Failure to make a timely response will cause your application to be voided. A refund of the application fee cannot be issued for a voided application.

More information about water rights and other matters administered by IDWR is available on the Internet at [www.idwr.idaho.gov](http://www.idwr.idaho.gov). Please contact me at 208-334-2190 if you have any questions.

Sincerely,

Nicholas Van Dyke  
Sr. Water Resource Agent
