RE: Water Permit No. 97-7486

Dear Permit Holder:

I am currently preparing the licensing of your permit for water from a spring for domestic, fire protection, and industrial use on your property. Regarding the industrial use, your application for the permit (copy enclosed) mentions water is needed in the sawmill for machinery. In reviewing my notes from the field visit I conducted this past May to examine your system, I either forgot to ask for an estimate on sawmill water usage or failed to make note of it. Before I can move the license towards completion, I need information or an estimate on how much water is used for industrial use (ex. gallons per day).

Please provide information or an estimate of water consumption for the industrial part of your permit. If you have any questions, please feel free to contact me at (208) 334-2190 or at nick.vandyke@idwr.idaho.gov

Sincerely,

Nicholas Van Dyke
Sr. Water Resource Agent
