APPLICATION FOR TRANSFER OF WATER RIGHT PART 3

☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.

☐ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**

1. Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above.:

MEMORANDUM

Date: December 3, 2013
To: Transfer 78925 File
From: Jana Reeder
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes adding a new point of diversion to six existing groundwater rights (36-2409E, 36-2440A, 36-2543A, 36-2637B, 36-7096A & 36-7613). The new well will be drilled on an existing farm located approximately 5.6-6.8 mi. north and 2.4-3.7 mi. east of the city of Eden. Three wells (two existing and one new) will be used to divert up to 11.49 cfs and 2804 af for the irrigation of 701 acres on the farm.

The properties and points of diversions involved with the application are located within water district 130 and the ESPA but the three wells are all located in adjacent cells and are within 1 mile of each other so a model analysis is not necessary. Watermaster comments will be needed.

Note, the new well will be limited to 7.0 cfs and the processing fee has been adjusted accordingly.

Per 3/18/09 memo additional well is in the ESPA and does not require mitigation analysis and within POU of right so qualifies for no advertising.

- **Authority to File:**
The applicant is listed as the current owner of water rights 36-2409E, 36-2440A, 36-2543A, 36-2637B, 36-7096A & 36-7613 according to IDWR records.
- **Water Right Validity:**
Water rights 36-2409E, 36-2440A, 36-2543A, 36-2637B, 36-7096A & 36-7613 have been decreed in the SRBA. Review of aerial photos indicates that the lands involved with the transfer have recently been irrigated.
- **Injury to Other Water Rights:**
None anticipated. All three wells will be located on an existing farm within 1 mi. of each other and are in adjacent model cells.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No hydrological impact anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
