Dear: Mr. Dan Nelson

We the Boise District/Owyhee Field of Office BLM request that requirements for head gate and measuring device on projects Water Right # 57-07694 (Rockville Spring and Excloure (08915)) and Water Right # 57-07685 (Upper Rats Nest Spring (0075)) would please be waived for the following reasons. Both of these projects are a spring developments, collection box has been place in the spring source and diverted the water source into a trough. These troughs are design to divert any excess water back into its natural area or channel through an overflow open valve. No water entrapment is in place that would benefit from a measuring device or head gate. If possible we request that these requirements would be waived and allow these developments to continue as a water source for wildlife and livestock.
