Dear; Castle Creek Water District Master (Mike Ihli)

It was brought to our attention by Idaho Department of Water Resources that water right 57-7684 (Proj. #0974 White Horse Reservoir), water right 57-7685 (Proj. #09072 DR Pothole) and water right 57-7687 (Proj. #09073 RD Pothole) required a measuring device and head gate. A field visit was conducted to confirm that these objects were in place. Unfortunately at the time of construction these objects were no included.

We the Boise District BLM/Owyhee Field Office request consideration for waiver on these requirements. All three of these projects are small ponds that have been constructed in a dry drainage in hopes of spring runoff in order to fill. If possible we request that these requirements would be waived and allow these developments to continue as a water source for wildlife and livestock use. We thank you for your time and if you have any question please call me Raul Trevino.

Location Map Included.
