Scott wanted me to make sure it applies to measurement too. Thanks John.

Lori:
Your understanding is correct
I will place a statement in the data base comments.

Subject: Permit 63-33401 (Layne Thornton)

Good Morning John. We recently received a copy of the draft permit above for Layne Thornton...thank you. I had a question regarding Condition No. 12, which states:

"The right holder shall install or construct a straight length of conduit or ditch suitable for installation of a device for measuring the entire flow of water being diverted in connection with this right."

Based on our telephone conversation regarding the use of the three wells south of the road and pou, it's my understanding that we can locate a spot on the conduit that contains the combined flows from all three wells south of the road before or after the pipe goes under the road to the pou, rather than having to comply with each well. Can you confirm my understanding. Thanks John.

Regards,
Lori
