

MEMORANDUM

TO: File 97-7506

FROM: Daniel Nelson – Staff Hydrologist

DATE: February 6, 2014

SUBJECT: Licensing Review of Water Right 97-7506

The field examiner for this permit neglected to include a volume for the domestic use. There is no condition limiting the use to 13,000 gallons per day, so a volume is required for the domestic use. According the field exam, the domestic use includes in-house use and up to ½ acre of yard irrigation. Processing memo 22 states that for domestic use allow 0.6 af for in-house use and 0.6 af for irrigation. Therefore, I added a volume of 1.2 af for the domestic use for this right. This will increase the total volume to 2.6 af when added with the commercial calculated by the field examiner.

All of the conditions on the permit were carried through to licensing except for condition 082 as is standard. Condition 004 was maintained because the place of use covers several different tax parcels.

I corrected the address for this permit in WorkFlow to include spaces between the corporation's name. A search of the State Business search revealed that the name is correct without the spaces. I changed it back in WorkFlow.
