RE: Water Right Permit No. 75-07492

Dear Mr. Gattung:

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

The field examiners found two points of diversion for this water right. The first provided water from the pump to the sprinkler system. The second diversion allows for flood irrigation from a side channel of Gattung Slough. Based on the examiner's report, the following elements were developed differently than described on your permit:

 X Point(s) of Diversion

 Place(s) of Use

 Other

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100 filing fee within 14 days.

If you have any questions, please call me at (208) 287-4879

Sincerely,

Sandra Thiel
Water Resource Planner
