

MEMORANDUM

Date: January 14, 2014
To: Transfer 79040
From: Kade Raymond
Re: Review & Evaluation of Sufficiency of Information

Transfer 79040 proposes to change the point of diversion of water right 25-13201. The point of diversion was listed in the wrong quarter-quarter in the SRBA and this transfer was filed to correct the mistake. Spring box has always been located in the NWNW of Section 27.

Authority to File:

The applicant is the current owner of the water right per IDWR record. The applicant is the owner of the property where the point of diversion is located as well as where the place of use is located based on current tax lot data.

Water Right Validity:

Based on 2011 aerial photography the infrastructure is still in place for this stock water right to be used, therefore forfeiture is not an issue.

Injury to Other Water Rights:

The place of use for the water right of the proposed transfer is located within water district 01. The water master does not oppose the approval of this transfer. Because the transfer is to correct the location of the point of diversion on paper only and no physical change will occur this transfer will be processed as a non-advertised transfer.

Enlargement of Use:

No issues identified.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
