RE: Proof of Beneficial Use Submission & Request to Reinstate Permit

On 1/3/2014, Mr. Terry Henrickson came into the Western Region office to inquire about the status of permit 63-11116. He indicated the permit should be valid and needs to be licensed. Upon review, I found documentation to support the following as a timeline of events regarding permit 63-11116:

1. **6/11/1990** – permit approved.
2. **1991** – proof of beneficial use requested.
3. **6/6/1991** – proof of beneficial use returned to Mr. Henrickson for errors (confused what right proof is for) with request to correct and resubmit by 7/1/1991.
4. **6/24/1991** – Mr. Henrickson visited state office and filed transfer application to change PU of other rights to cover land under permit 63-11116, making permit unnecessary.
5. **7/5/1991** – permit lapsed with instruction permit can be reinstated if submit proof within sixty (60) days.
6. **7/31/1991** – Mr. Henrickson visited with Steve Lester regarding transfer filing. See attached Steve Lester memo dated 8/8/1991 for details. Outcome, permit 63-11116 necessary and proof of beneficial use was submitted (including fee) on 7/31/1991.
7. **8/8/1991** – Steve Lester memo along with attached proof of beneficial use and withdrawn transfer forms sent to state office.

It appears the permit was never reinstated after Mr. Henrickson filed his proof of beneficial use in 1991. I have been unable to locate a copy of the original proof of beneficial use form submitted by Mr. Henrickson, but I have found receipts confirming the proof filing fees were received in 1991. I requested Mr. Henrickson complete a new proof of beneficial use form during an office visit with him on 1/7/2014. I've attached that form along with the filing fee receipts, Steve Lester memo dated 8/8/1991, and a copy of the permit approval. It appears this supplemental well permit should be reinstated without requiring Mr. Henrickson to submit a certified water right examiner's examination, because it appears Mr. Henrickson followed all the required steps for permit reinstatement within the sixty (60) day timeframe allowed.
