Sandy:

Thanks for the information. I will put this email in my files. I have no intention of modifying the existing ponds.

Steve

Subject: Water Right 86-11987 Licensing Review.
Importance: High

Dear Mr. Busch,

I am currently conducting the licensing review for water right 86-11987. In a meeting yesterday with Shelley Keen, Water Allocations Manager, it was determined that the one larger pond (designated as Pond 1) is a "natural pond," since no evidence was found that this pond had been enlarged, developed, or excavated. For this reason, at this time no water right is required for this pond.

Two other ponds were also found in Section 6 , SWSW7. These two ponds have also been determined to be "natural ponds," and do not require a water right at this time.

An Application for Permit has been attached to this email, along with copies of topo maps designating the locations for the above described ponds. In the event any changes or excavation are conducted on these ponds, they will no longer be classified as "natural ponds," and will require an Application for Permit to be filed.

If you have any questions, please give me a call.

Sincerely,

Sandy Hemenway
Sr. Water Resource Agent
