Entering Well Location

Enter the row and column for the 'TO' well. Enter the row and column for the 'FROM1' well. Enter the row and column for the 'FROM2' well. If the 'FROM2' well is the same as the 'FROM1' well, enter the same row and column. If the 'FROM3' well is the same as the 'FROM1' well, enter the same row and column. The 'FROM3' well can be the same as the 'FROM1' well or the 'FROM2' well.

Running the Model

Once the model cells are entered, push the 'RUN MODEL' button. The model will run and the results will be displayed. The model needs to be re-run if the input data changes.

Getting the Model Output

Once the model has been run, the results will be displayed. The model output can be saved to a file or printed. This process can be repeated for each year of the simulation.

Entering water use data

All water use should be entered in the 'TO' well column. For instructions on how to enter water use data, see the user manual.

Entering 'TO' Well Projected Use

Enter the projected water use for the 'TO' well. The projected water use should start in the first trimester of the simulation.

RE: Corner Water Applications

To: Who it may Concern,

While employed by my former employer, Cornelison Farms, during the period of time 1992 thru 2006, I have observed the following. Water has been applied to the area represented on the attached Map. These water applications normally would occur approximately the last of October and/or the first part of April. The irrigation purpose being germination for Crested Wheat Grass or Cereal Rye grown for internal use.

During my Employment with Larsen Farms I have also observed this water application continuing.

A handwritten signature in black ink, appearing to read 'Scott Clawson', is written over the typed name.

I have been employed in the Hamer area for the last 20 years. During this time I have watched water applied to the corners of the attached map. The water was applied very late in the fall or early in the spring. This was not every year for the same corner. It seemed like two or three years apart for some corners.

A handwritten signature in blue ink, appearing to be 'CH' followed by a long horizontal line.

I, Jace Rumsey, worked in the Hamer Area referenced in the attached map, during the period 1997 thru 2008. I worked on the farm where the map indicates for Cornelison Farms, and later nearby as a neighbor when working for Silver K Farms. During this period of time, I watched water being applied in these areas with handlines, in the early or the last of the water season. This did not occur every year but multiple times through this period.
