Sean and Dennis,

Just wanted to give you a heads up about this permit we approved in North Ada County. We restricted the well to the shallow aquifer (< 200'). The applicant is ok with the concept, but they have an agreement with a neighbor to case the proposed well below the depth of the neighbor's well (about 125'). The applicant is concerned that the remaining 75' might not be sufficient given nature of the shallow aquifer(s) in the area. The applicant's consultant plans to provide information that the deep aquifer is closer to 300' in the area. They filed their petition for reconsideration on November 18 and will plan to get data to us ASAP. We need to respond within 21 days of the petition or it will be automatically denied by law. The response date is December 9. When their report comes in, I'll get it right to you. If it comes in unreasonably close to the deadline, we'll likely withdraw the order approving the permit to give us time to respond with a new permit.

Jeff
