Michael,

If my memory serves, this comes out to less than the acres that you calculated. Didn't you calculate 2200+ acres? That is perfect. You can say that you found a possible 2200+ acres and the canal company confirmed that 2108.4 acres are being irrigated. Therefore, this license is limited to 2108.4 acres within the large place of use.

Dan,

Is this accurate as a reply -

Ron,

Thank you. That's exactly what I wanted and comes very close to the estimate from the shapes I had highlighted.

The Place of Use condition will look like this:

2-10416 is limited to the irrigation of 2108.4 acres within the service area of the Gem Irrigation District.

Michael,

The top location on the map is called the D and the D-2 lateral with a total of 1,271.7 acres. The bottom location is called the Patch lateral with a total of 836.7 acres. These acres can be serviced under the pumps at the red location. Let me know if this is what you wanted.

Ron
