APPLICATION FOR TRANSFER OF WATER RIGHT
PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements)

- ☐ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☒ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**

MEMORANDUM

Date: January 6, 2014
To: Transfer 78964 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

Application proposes connecting a group of water rights appurtenant to a farm (GW Finance farm) located approximately 16.5 – 18 miles north and 6.1 – 7.5 miles east of Malta with a group of water rights appurtenant to an adjacent farm (Webb Brothers Land & Livestock farm) located approximately 11.5 – 16.5 miles north and 5.1 – 7.6 miles east of Malta to form a permissible place of use between the two farms. The GW finance farm currently has 3 Raft River water rights and 4 groundwater rights appurtenant to it and the Webb Brothers Land & Livestock farm currently has 3 Raft River water rights and 23 groundwater rights appurtenant to it (total of 6 Raft River rights and 27 groundwater rights between the two farms). The systems on the two farms (a total of 13 existing wells and two existing Raft River diversions) will be connected to allow for the diversion of up to a total of 64.92 cfs of water from groundwater and Raft River for the irrigation of a total of 3,198.4 acres within a 4,326.1 acre permissible place of use. The ownership of the rights will not change as a result of this transfer (see Transfer Authorization and Acknowledgment Statements included with transfer). The transfer also proposes correcting a legal description of one of the wells since the well currently described in Section 7 on the GW Finance groundwater rights is actually located in Section 18. In addition, the transfer also proposes removing a point of diversion from the GW Finance Raft River rights because it does not exist.

- **Authority to File:**
The applicants are listed as the current owners of the rights according to IDWR records. Copies of deeds have been included with the application showing that the applicants own the land involved with the transfer. The ownership of the rights will not change as a result of this transfer (see Transfer Authorization and Acknowledgment Statements included with transfer). A letter of consent from Northwest Farm Credit Services has also been included with the application.
- **Water Right Validity:**
The rights involved with the transfer were decreed in the SRBA. The GW Finance rights were involved with a transfer that was approved in October of 2009. The Webb Brothers Land & Livestock rights were involved with a transfer that was approved in May of 2010. Recent aerial photography supports the use of the rights. Possible forfeiture of the rights involved with the transfer does not appear to be an issue.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No negative impact anticipated. Application will be subject to public notice advertising.
- **Beneficial Use/Conservation of Water Resources:**
Proposed uses are recognized as beneficial uses of water.
- **Effect on Economy of the Local Area:**
None anticipated.
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

RE: Webb Brothers Land & Livestock, LLC
GW Finance, LLC

Dear Cory:

Webb Brothers Land & Livestock, LLC and GW Finance, LLC, by member Todd Webb, has submitted for review to Northwest Farm Credit Services a signed copy of an application for transfer of water rights under Idaho Department of Water Resources Transfer #78964. It is our understanding that the transfer application needs consent from all mortgage holders who have liens on the ground associated with the points of diversion and use. In review of the application, the transfer is to connect two adjacent permissible places of use on adjacent farms, referenced above. Also, all current groundwater points of diversion will be points of diversion on all of the groundwater rights involved in the transfer. Upon review, Northwest Farm Credit Services who holds an underlying land mortgage on a portion of the real property describe under Transfer #78964, does not object and gives full consent to pursue the completion of the application for transfer.

Should there be any additional questions or concerns, please give me a call.

Sincerely,

Robert E. Blakeslee
