
TELEPHONE MEMORANDUM

TO: LICENSING FILE 63-31658
FROM: VICKY MUSIC
SUBJECT: CALL TO VOID THE PRELIM VOID ORDER
DATE: NOVEMBER 4, 2013
CC:

Ramon Yorgason, the developer of the Baldwin Park subdivision, and the owner of record called on September 24, 2013, after receiving the preliminary order to void the permit. I told him that I conducted a field exam and I did not find that the permit had been developed.

Mr. Yorgason stated that he was sure it had been developed because he has done the same thing in a few other subdivisions. He stated that there is a sump in the pump house that is less than 18 feet deep; he guesses it is 12 feet to 15 feet deep. It is located under a grate in the pump house. In the sump, the groundwater and the surface water from Settlers co-mingles and is conveyed to the place of use.

He also requested that the permit not be voided, and sent an email request stating that.

I conducted another field exam and confirmed the sump, and will process the field exam so the permit can go to licensing.
