E. NARRATIVE/REMARKS/COMMENTS

9/8/97 site visit per Mrs. Drake's tele. info:

Parked at cattle guard walked up old skid road near draw & located 3" PVC pipe feeding 24" stock tank.

9/11/97 Mrs. Drake called again. Said there is another spring that should be part of this right. Directed me to go further up road to metal gate & will see similar setup.

3/11/98 tried to access site while in area but too muddy to make it.

9/30/98 made second site visit. Followed her directions & found new metal gate (see photo #2) & second spring development that mimics first one found in 1997.

Both springs are nonmeasurable, at least by fall of year. Springs serve some livestock. Springs are not physically visited by pipeline etc.

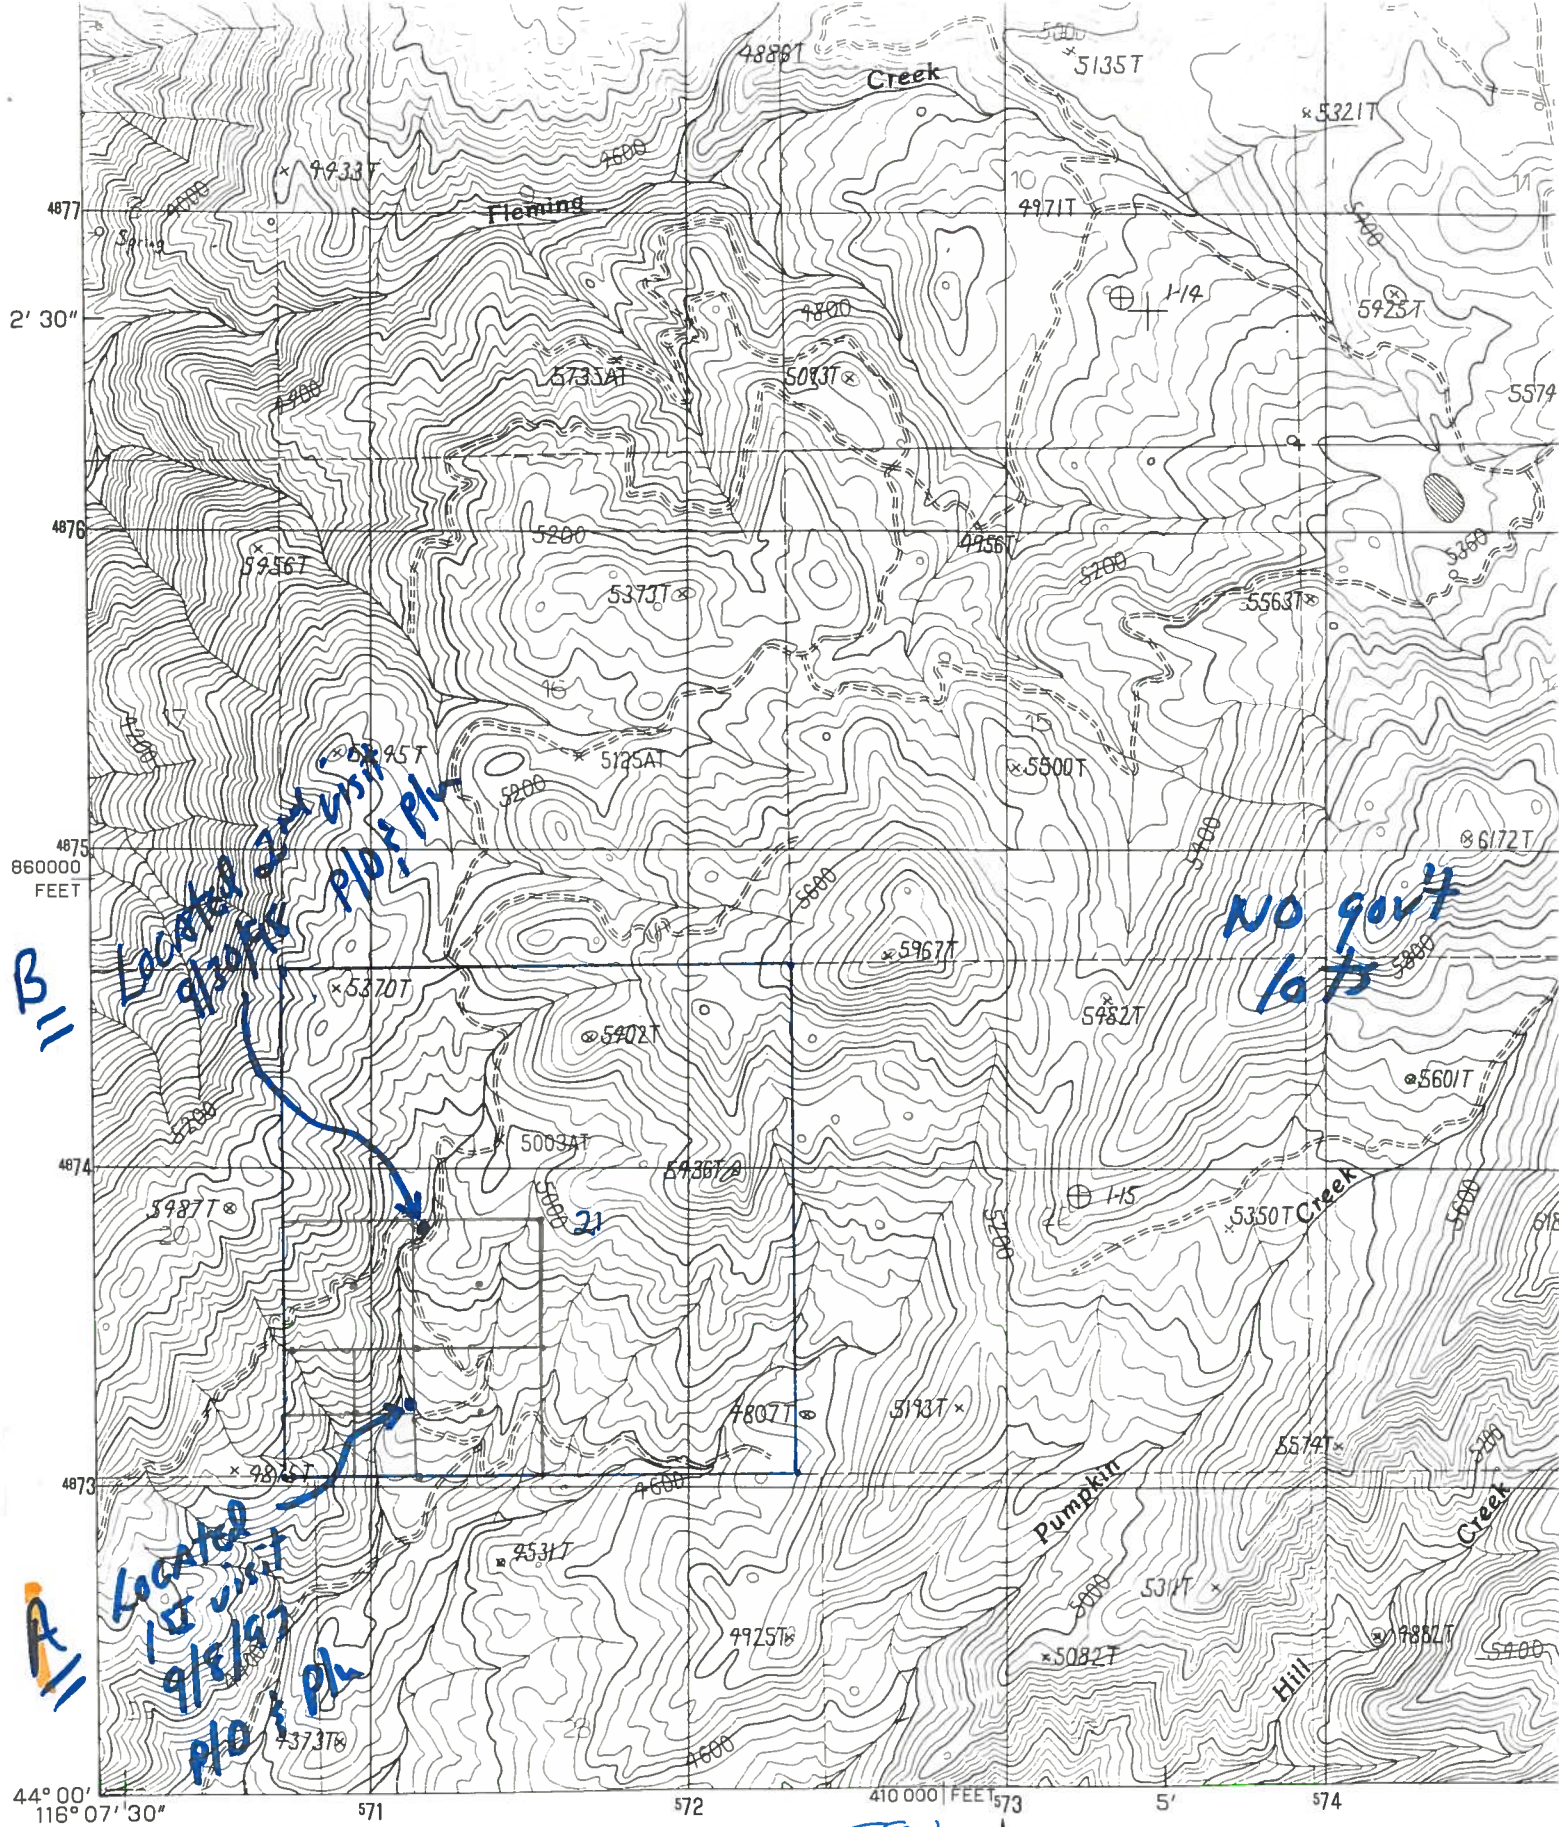

No domestic use found, just stockwater. This ~~matches~~ matches prior filing.

Recommend as A+B where combined amounts for same cattle are .02 cfs & RFA.

Have conditions of permit approval been met? ☒ yes ☐ no

RE: Water Right Permit Nos. 65-13007 and 65-23564

Dear Permit Holder:

The Department of Water Resources is reviewing the above referenced permits prior to issuing water right licenses. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. In September of 1997 our examiner visited the development under Permit 65-13007. Following that visit you contacted him and said a second spring had been developed under this permit but had been overlooked by the examiner. Our examiner conducted a second field visit in September of 1998 and found that there was another spring developed. Unfortunately we did not get around to licensing the springs until now.

The spring originally developed is in the same location as proposed under the permit. The second spring, which was not included on the original permit, must be "added" to the water right by submittal of the enclosed licensing amendment. We have proposed licensing each of the springs under separate water right numbers as shown above. The problem we have now encountered is that, according to tax lot records, the second spring is on property now owned by Joseph & Katherine Whitfield. In Idaho, a water right permit is considered personal property and only the permit holder can take action in regard to the permit. In this case, the permit is in the name of Calvin Drake, who we have been informed is deceased. We can accept a signature on the licensing amendment from any party who has interest in the permit. If the spring is being utilized by the Whitfield's, they may want to submit the licensing amendment and \$100.00 filing fee to make sure the development is licensed. We are sending the request to your address since you have interest in the property previously owned by Calvin. If we license the second spring in the name of Calvin Drake, a change in ownership form can then be submitted by the new owner's to change the water right into their name. If they are not using the spring and stock tank we can note that in our files and remove this spring from our records.

The enclosed Application for Amendment form depicts the elements of the water right, for the second spring, as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days. If you need additional time to confirm the second spring is being used or for coordination with the current land owners, we can allow additional time upon request.

If you have any questions, please feel free to call me at (208)334-2190.

Sincerely,

A handwritten signature in black ink that reads "Kay Walker". The signature is fluid and cursive, with a large loop at the end of the last name.
