Re: Applications for Permit No. 67-15099

Dear Mr. and Mrs. Williams:

The application you submitted on June 11, 2013, has been assigned to me for processing. The application seeks a new ground water right for irrigation to supplement your Snake River surface water right. Your application states that you want a ground water right to use when the Snake river gets low and you cannot use your Snake river right, 3-10257, which authorizes 0.28 cfs for the irrigation of 14 acres. The Department must more information before processing can continue

A review of aerial photographs for the years 2004 through 2011 reveal that water right 3-10257 have not been exercised, and the 14 acres have not been irrigated during this time period. Department notes from the field exam in 2012 for your 67-14517 ground water right indicates that the right has not been used since the mid-1990s.

If true, right no. 3-10257 may have been forfeited or abandoned, and you have two options. You can resume use of your Snake River during the 2014 irrigation season, or you can verify that you have not used the surface water right for a specified time period, and do not intend to resume the use. Idaho law states that a right can be forfeited after 5 years of nonuse, although there are defenses to forfeiture for good reason.

Also, according to IDWR records, the Snake River does not get too low to satisfy the water rights diverted from it. The supply of water from the Snake is more than adequate during the entire irrigation season. You will need to provide a different reason for the ground water application.

To summarize, please provide the following information in writing:

1. Whether you intend to use the Snake River water right next year, and whether you have diversion works, such as a pump and piping, from the Snake River to your property. The reason the Snake River right has not been used in several years.
2. Why you need the ground water for irrigation when you have a Snake River right for 14 acres irrigation?

Please call me as soon as possible after you receive this letter so that we can discuss your application and options further. You can reach me at 208.334.2190.

Please submit the additional information so that IDWR can continue to process the application. Alternately, you may seek additional time up to six month to provide the information. The requested information or a request for more time to obtain the information must be received in writing by December 20, 2013. Failure to submit the information may result in the application being voided. Fees are not refunded for voided applications.

Thank you.

Dr Vicky,

In reference to our Snake River right 3-10257, we have decided that due to the inefficiency of the current irrigation system and the high cost of repairing it, that it would be best to forfeit that right and continue with the application for 67-15009 ground water right as our primary source of irrigation water for the entire 11 acres.

We appreciate very much your cooperation in this matter and if there is anything else we can help with feel free to call.

Thank you

Randy
