RE: License 15-7126 / Amendment for Permit 15-7122

Dear Ms. Andersen:

Thank you for signing and returning the Application for Amendment for Permit 15-7126. Once the elements of the permit were adjusted to the correct location, the Department could issue a final water right license. Enclosed is the license for water right 13-7126. It is now a completed water right.

You have one other permit in the area that needs adjusting prior to the issuance of a final water right license. Permit 15-7122 is for stockwater and irrigation from a small spring. The permit was issued in the early 1990s. I've included a copy of the permit for your reference.

A field exam revealed that the spring and irrigated acres were in a different location than was described on the permit. Just like water right 15-7126, this permit must be amended to correct the legal description for the point of diversion before a final water right license can be issued.

I have enclosed a map showing the location of the spring and the irrigated acres. If the application for amendment (for licensing purposes) looks correct, please sign the application (highlighted in yellow) and return the signature page with a filing fee of \$100.

I apologize for the additional hassle to bring this water right to a final license, particularly the filing fee. This work should have been done in the late 1990s. We are working to address all of the oldest permits in Oneida County. Thank you for your willingness to correct your water right. Feel free to call if you have any questions.

Sincerely,

James Cefalo
Water Resources Program Manager
