Re: Application For Permit to appropriate the Public Waters of the
State Of Idaho

Dear Mr. and Mrs. Herndon:

The Idaho Department of Water Resources has started the process of reviewing your application for a water right. In doing so several items were discovered that need to be changed before processing can be completed. To save time I've developed an electron version of your application that includes the necessary changes such as changing the acre foot per acre numbers for stock water and irrigation to an instantaneous diversion rate. The annual volume figures will be developed at the time a permit is licensed.

Please look over the attached application and if it meets with your approval, sign and return the document to me within the next 30 days so as not to further delay processing. If you have any questions, don't hesitate to contact me at this office.

Thank you.

Sincerely,
