APPLICATION FOR TRANSFER OF WATER RIGHT PART 3

☐ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**. If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

☒ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**

1. Describe how the supplemental water rights have been used historically in conjunction with other water rights at the **existing** place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above.:

Some of the GW rights are at least partially supplemental (Some GW rights have primary acres). Rights are already in a PPU, and this transfer proposes modifying the PPU boundary. Current right limits will continue after this transfer and the rights will continue to be used as they have in the past. Potential enlargement of any supplemental rights should not be an issue.

MEMORANDUM

Date: December 16, 2013
To: Transfer 78902 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

Application proposes changing the authorized place of use (permissible place of use) for 12 Marsh Creek water rights and five groundwater rights used to irrigate the main Six S Ranch property located east of Declo. Currently the 17 rights allow for the irrigation of a total of 2,115.8 acres within a 2,620.6 acre permissible place of use as described by transfer # 77648 (approved March 12, 2012). This current transfer (#78902) proposes changing the currently authorized 2,620.6 acre permissible place of use to a proposed 2,669.5 acre permissible place of use to more accurately describe irrigated areas and to allow for the installation of additional pivot sprinkler systems. Because the transfer only proposes modifying the place of use to adjacent lands there should be no hydrologic impact and it is recommended that the transfer be processed and approved without any public notice advertising. The surface rights are located within water district 45F (Marsh Creek) and the groundwater rights are located within water district 140 and injected into and reddiverted from Marsh Creek so water district 45F and 140 water master comments will be solicited.

- **Authority to File:**
The applicant is listed as the current owner of the right according to IDWR records. A copy of a warranty deed has been included with the application showing that the applicant owns the land involved with the transfer.
- **Water Right Validity:**
The rights involved with the transfer were decreed in the SRBA in June and July of 2005. The rights have been involved with recently approved transfers with the last transfer involving all of the rights being approved in March of 2012. Recent aerial photography supports the use of the rights. Possible forfeiture of the rights involved with the transfer does not appear to be an issue.
- **Injury to Other Water Rights:**
None anticipated. Transfer only proposes modifying the place of use to adjacent lands so there should be no hydrologic impact
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No negative impact anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed uses are recognized as beneficial uses of water.
- **Effect on Economy of the Local Area:**
None anticipated.
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
