Corey,

I referred your message to Harriet Hensley, the deputy AG who worked on the agreement between IDFG and GIC. She has a great deal more perspective on the matter than I do. I think she may plan to contact you directly.

I added the report you forwarded to the water right file. Thanks for sharing it.

Sincerely,

Shelley Keen

Subject: FW: Water Right 11-7219 Georgetown Irrigation Co (GIC) - Looking for current agreement between GIC, IDFG submitted to IDWR

Shelley,

I am a fisheries biologist working for the USFS in SE Idaho and I have been looking into the Georgetown Irrigation Co water right 11-7219. Specifically, I am looking for the current agreement between GIC and IDFG that would have been developed prior to the Issuance of License (4/9/2009). I have gone through all the attached files from the IDWR water rights database (that is also where I got your contact info) and the most recent I found was a 9/30/2007 version that was signed two years prior to the issuance of the license. My hunch is that this is not the final agreement as some of the conditions of approval found in the current water right license are not included in this version of the agreement.

I have cc'd Blaine Newman, Natural Resource Specialist and Special Use Permits coordinator at the BLM in Pocatello Field Office in this email request. Overall, we are both looking for the final agreement to add to our files and would appreciate any assistance you can offer on this matter.

I will be in the office tomorrow morning if you want to contact me directly. I wouldn't mind getting your perspective on some of the negotiations that took place during the licensing process for this water right. I have also attached an Accomplishment Report for the fishway that was completed in 2009 at the GIC POD. The current agreement I am looking for includes details on the fishway operation.

Thanks

Corey Lyman
