Applicant proposes to transfer 35 ac from corners of the pivot (see Attachment #7b for map) covered under water rights 31-2282A, 31-2372, and 31-7196C to the permissible place of use (PPU) described under water right nos. 31-4089, 31-4090, 31-4117, 31-10405A, and 31-10405B. The previous irrigated acreage allowed under the PPU was 686 acres within a PPU of 1,777 acres. With the addition of 35 acres through this transfer, the new irrigated acreage allowed is 721 acres within the existing PPU. Attachment #7a illustrates the permissible place of use boundary and the proposed irrigated acres for the upcoming irrigation season.

There will be no enlargement of acreage irrigated or water diverted. Proportionate shares of each of the rights will be transferred, along with the combined use limits in proportion. The table below shows the proportionate shares of each of the water rights and the combined use limitations as they exist currently and the portions that are proposed to be transferred.

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future: The existing wells will be tied together using mainline and will be capable of distributing to various pivot locations within the place of use. The pivot sprinklers may be relocated annually to different pivot sites that will be connected to the mainline.

b. Who owns the property at the point(s) of diversion? Applicant

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system: _____

c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? No ☐
If yes, ☒ Attach a notarized statement from the holder of the lien, deed of trust, mortgage, or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: Zions Bank holds the mortgage. A certified letter is attached.

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

d. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:

The land now irrigated will no longer be irrigated.

e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) of use:
Five other water rights overlap the proposed place of use. These rights are described in a permissible place of use totaling 1777 acres. This transfer proposes to add 35 acres to the irrigated acreage within the permissible place of use. The diversion system will be shared with the proposed transferred water rights. There are no other water rights on the existing place of use.

f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes	No	
☐	☒	undergone a period of five or more consecutive years of non-use,
☐	☒	currently leased to the Water Supply Bank,
☐	☒	currently used in a mitigation plan limiting the use of water under the right, or
☐	☒	currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe: _____

The historical consumptive use volume was used in the ESPA transfer analysis above. According to ET Idaho 2012, the historical consumptive use of alfalfa-less frequent cuttings, as determined data collected at the Montevue Agrimet station, is 2.27 acre-feet per acre per season. For 35 acres, the historical consumptive use would therefore be 79.5 afa, or 26.5 af/trimester. The analysis above shows that the proposed transfer **does not** exceed the allowable affects to the reaches of the Snake River. All affects are below the 2 af/trimester threshold.

Part 1A.2 Narrative.

Applicant proposes to transfer 33 ac from corners of the pivot (see Attachment #7b for map) covered under water rights 31-2282A, 31-2372, and 31-7196C to the permissible place of use (PPU) described under water right nos. 31-4089, 31-4090, 31-4117, 31-10405A, and 31-10405B. The previous irrigated acreage allowed under the PPU was 686 acres within a PPU of 1,777 acres. With the addition of 33 acres through this transfer, the new irrigated acreage allowed is 719 acres within the existing PPU. Attachment #7a illustrates the permissible place of use boundary and the proposed irrigated acres for the upcoming irrigation season.

There will be no enlargement of acreage irrigated or water diverted. Proportionate shares of each of the rights will be transferred, along with the combined use limits in proportion. The table below shows the proportionate shares of each of the water rights and the combined use limitations as they exist currently and the portions that are proposed to be transferred.

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future: The existing wells will be tied together using mainline and will be capable of distributing to various pivot locations within the place of use. The pivot sprinklers may be relocated annually to different pivot sites that will be connected to the mainline.

b. Who owns the property at the point(s) of diversion? Applicant

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system: _____

c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? No ☐
If yes, ☒ Attach a notarized statement from the holder of the lien, deed of trust, mortgage, or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: Zions Bank holds the mortgage. A certified letter is attached.

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

d. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:

The land now irrigated will no longer be irrigated.

e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) of use:
Five other water rights overlap the proposed place of use. These rights are described in a permissible place of use totaling 1777 acres. This transfer proposes to add 33 acres to the irrigated acreage within the permissible place of use. The diversion system will be shared with the proposed transferred water rights. There are no other water rights on the existing place of use.

f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes	No	
☐	☒	undergone a period of five or more consecutive years of non-use,
☐	☒	currently leased to the Water Supply Bank,
☐	☒	currently used in a mitigation plan limiting the use of water under the right, or
☐	☒	currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe: _____

A. PLAT MAP (See Part 3A for Instructions for application for transfer for complete requirements.)

- ☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
- ☒ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemental, both before and after the change.
