RE: Water Rights Application for Permit #'s 87-10076 and 87-10077

RECEIVED
DEC - 9 2013
IDWR/NORTHERN

Dear Mr. and Ms. Olson,

DEQ has received a request for comment on the approval of two water right applications to draw groundwater from two existing wells located on property in Latah County. Application # 87-10076 will draw 0.12 cfs from a well that was constructed in 1973 for domestic, irrigation, and stock water use from January 1 to December 31. Application # 87-10077 will draw 0.09 cfs from a well that was constructed in 1984 for domestic, irrigation (up to ½ acre), and stock water use from January 1 to December 31.

Based on the information that has been provided, DEQ cannot estimate nor predict impairments to surface or ground water beneficial uses resulting from the requested withdrawal. However, assuming all federal, state, and local permits have been obtained, regulations met, and reviews completed, we can offer the following comment.

It is the policy of the State of Idaho Ground Water Management Plan that existing and projected beneficial uses of ground water and interconnected surface water be maintained and protected, and degradation that would impair beneficial uses of ground water and interconnected surface water not be allowed.

Thank you for requesting our review and comment of your activity.

Sincerely,

A handwritten signature in cursive script that reads "Cindy Barrett".
