**RE: Applications for Extension of Time to Avoid Forfeiture of a Water Right for
Water Right Nos. 25-14240, 25-14242, 25-14243, and 25-14340.**

Dear Blake:

Enclosed for processing are *Applications for Extension of Time to Avoid Forfeiture of a Water Right* for the above referenced water rights. These are used in conjunction with the mitigation plan associated with a number of domestic in-house use only water rights for use within the Comore Loma Subdivision located south of Ammon in Bonneville County. As explained in the applications, we believe these water rights are associated with a mitigation plan because they are used to mitigate for the outside use of water under the subdivision's other water rights. Nevertheless, because of the substantial investment made by my client to purchase and then file a transfer to allow for use of these water rights within the subdivision, out of an abundance of caution, we are submitting the enclosed applications for processing to avoid any potential argument that the water rights are not valid. This is important to our client because there are positive signs of improvement in the housing market, which would allow for further development of the Comore Loma subdivision within the next 10 years. These water rights will be critical to the further development of the subdivision.

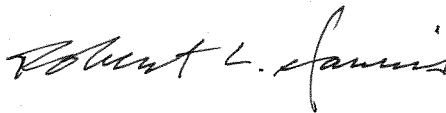

We have also included a map and spreadsheet that shows each lot within the Comore Loma subdivision, and the water rights associated with covering that lot with in-house domestic water, as well as the outside irrigation component.

If you have any questions or concerns, please let us know. We appreciate your attention to this matter.
