Subject: Clerical errors on a group of rights

Shelley,

Not sure if this is something we should pursue, but I thought I would document this and forward it on to you... it looks like a group of James Whittaker's rights from Basin Creek have a number of errors on the Partial Decrees that he may want to correct. The errors appear to be as follows based on aerial imagery and consistency within the group of rights:

74-15663 lists four PODs in Section 35 and 36. These appear to be incorrectly described as being in T14N R25E, when they probably should be in T15N R25E.

74-15663 also lists a POD in SENE of Sec 36, T15N R25E. This POD likely should be in the SWNE of that section.

74-2088 seems to have carried over a few errors from a signed SF5... First, the combined rate limit condition that references WR 74-15332 should probably refer to 74-15662 instead to be consistent with the other rights in the group. Second, the right shows a POD in the NESE of Sec 36, T15N R25E. This POD likely should be in the SWNE of that section. Third, the right shows a POD in the SESE of Sec 36, T15N R25E. This POD likely should be in the SESE of Section 35, T15N R25E.

74-2095 lists a POD in SENE of Sec 36, T15N R25E. This POD likely should be in the SWNE of that section.

74-2148 lists a POD in SENE of Sec 36, T15N R25E. This POD likely should be in the SWNE of that section. Second, the right lists a POD in SESE of Sec 35, T14N R25E. This POD likely should be in the SESE of Sec 35, T15N R25E.

It looks like Roxanne or someone else saw these and did some correlation so the points are more like what they should be, rather than what the rights say. I didn't "fix" those rights back to being consistent with the decrees because it is more useful to me as is, but you can correct them in WRedit if you feel strongly about it...

Nick.
