Kerrie

Our records show we sent in \$100 and should have sent in \$200. I am processing another check for the second permit. I have highlighted the place of use map to show township and range that our jurisdiction falls in. Let me know if you need more. The permits are in the hands of the commission and I will send them as soon as they are signed.

Thanks

Good Morning:

The Department has received your applications for permit. Unfortunately, the applications cannot be processed as they were received.

In the Eastern Snake Plain Aquifer, there is a moratorium hold on all new consumptive use water rights which exceed the Domestic Exemption as defined in Idaho Statute 42-222.

The applications as submitted exceed the limits as defined in 42-222, the use of up to 2500 gallons per day. I have attached two amended applications limiting the diversion volume to 2500 gal per day. These two applications would authorize the diversion of up to 2500 gal per day from each of the proposed wells. If the County feels that this would not be enough water the only other options is to find existing water rights to purchase and transfer to this place of use.

If you would like to move forward with these applications as limited please complete the following and return:

1. Sign and return both applications
2. Verify the place of use list that I put together for you.
3. The application fee is \$100.00 PER application, please remit the balance of \$100.00

I called and left a message for you yesterday to discuss, please give me a call if you have questions.

Thank you,

Kerrie Mathews
