IDWR / NORTH

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

Ident. No. 86-12018

1. Name of applicant(s) John & Kelly Dahlquist Phone 208-276-3155
Name connector (check one): ☐ and ☐ or ☒ and/or
- Mailing address: 23886 Howard Gulch City Juliaetta
State Idaho Zip 83535 Email: idahowings@gmail.com
2. Source of water supply 5 undeveloped springs which is a tributary of Howard Creek
3. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #

4. Water will be used for the following purposes:

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

5. Total quantity to be appropriated is (a) 0.82 cubic feet per second (cfs) and/or (b) 38.60 acre-feet per year (af).

6. Proposed diverting works:

- a. Describe type and size of devices used to divert water from the source. Field tile to collect at source; gravity flow to 40x90 pond for uses, all overflow to Howard Creek.
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11.
For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? 1991; drilling firm Uhlenkott;
Well was drilled for (well owner) Robert Courville; Drilling Permit No. 86-91-N-21

7. Description of proposed uses (if irrigation only, go to item 8):

- a. Hydropower; show total feet of head and proposed capacity in kW. _____
- b. Stockwatering; list number and kind of livestock. 20 cows or 100 Goats
- c. Municipal; show name of municipality or the applicant's qualifications as a municipal provider. _____
- d. Domestic; show number of households 1 household
- e. Other; describe fully. _____

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	

Total number of acres to be irrigated: _____

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? Currently have well for domestic; need backup for power outages. Water from springs to be used for irrigation, domestic, stockwater, and fire protection.
10. a. Who owns the property at the point of diversion? John and Kelly Dahlquist
- b. Who owns the land to be irrigated or place of use? John and Kelly Dahlquist
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____
11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Property has 5 undeveloped springs that we intend to collect and use for irrigation, domestic, stockwater, and fire protection. All water once collected would flow to an established 40x90 pond, for storage ad use. Once pond is full all overflow goes back to Howard Creek, distance 100 feet. Pond dimensions 40x90 average depth 4 ft.
12. Time required for completion of works and application of water to proposed beneficial use is 2 years (minimum 1 year).
13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

IDAHO DEPARTMENT OF WATER RESOURCES

Applying for a Permit to Appropriate Water in the Salmon and Clearwater River Basins

Idaho Code § 42-203A(5) requires IDWR to evaluate the following criteria for applications to appropriate water:

- The potential to reduce the quantity of water under existing water rights
- The sufficiency of the water supply for the proposed appropriation
- The good faith nature of the application
- The adequacy of the applicant's financial resources
- The local public interest in the public water resource
- The conservation of water resources in Idaho
- Impacts to the economy of the local area or watershed

To ensure that IDWR has sufficient information to evaluate the criteria, Rule 40.05 of the Water Appropriation Rules (IDAPA 37.03.08.040.05) requires water right applicants to submit additional information to IDWR in connection with their applications.

The additional information requirement is usually waived for applications proposing the appropriation of 5.0 cfs or less or the storage of 500 af or less. Because the waters of the Salmon River and Clearwater River drainages are habitat for fish species listed as endangered or threatened under the federal Endangered Species Act, caution is necessary to ensure that new appropriations of water do not undermine efforts to protect and restore the ESA listed fish species and other public values in the basins' rivers and streams. IDWR is, therefore, requiring that applicants submit the additional information required by Water Appropriation Rules 40.05.c through 40.05.g, even when the applications are for less than the usual 5.0 cfs/500 af threshold. Only certain applications for small domestic and stockwater uses and applications to divert ground water for domestic use in multiple homes are exempt from the additional information requirement. A copy of Water Appropriation Rules 40.05.c-g is printed on the back of this page.

Please submit the information required by Water Appropriation Rules 40.05.c-g to IDWR within 30 days from the date you are notified that it is required. IDWR will hold your application until you have submitted the additional information. If you believe that a particular piece of information is not relevant to your application, please explain why. A complete response to Rule 40.05.f, Information Relative to Financial Resources, is not required if construction of your project will cost less than \$5,000. Instead, simply state the projected cost of your project. If you do not respond within 30 days, IDWR may void your application. If you need additional time to submit the required information, please submit a written request. IDWR can grant additional time "upon a showing of good cause."

The following are agency representatives who will help you respond to the local public interest requirement of Rule 40.05.g. Please contact these agency representatives at least 15 days prior to the end of your 30-day response period.

Idaho Department of Fish and Game contact list for water right applications:

Panhandle Region: Mary Terra-Berns at 208-769-1414

Good morning, Karen ~

Please publish the attached legal notice on the dates indicated, October 17 and 24, 2013, (once a week for two consecutive weekly issues). If you cannot publish the notice on the proposed dates, please contact me immediately. I would appreciate being sent a proof/preview copy for my review before this goes to press.

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to Dianne Ball, Idaho Department of Water Resources, 7600 N. Mineral Drive, Suite 100, Coeur d'Alene, Idaho 83815, before November 8, 2013. Your cooperation is greatly appreciated.

Should you have any questions, please do not hesitate to contact me.

RE: Application For Permit No. 86-12018

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the LEWISTON TRIBUNE on 10/17/2013 and 10/24/2013. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

KEITH FRANKLIN
Program Manager

MEMORANDUM

To: Water Right Application # 86-12018

From: Eric Davis

Date: October 1, 2013

Re: Application for a permit to Appropriate Water within the Salmon and Clearwater River Basins.

Re: Regional Analysis and Recommendation in with Water Appropriation Rules (IDAPA 37.03.08.040.050).

Water Supply Information.

The Idaho Department of Fish & Game and the Department of Environmental Quality have no objection to the application of Water Right #86-12018. This application is for withdrawing a diversion rate of 0.82 cfs from five (5) undeveloped springs for the purpose of supplying irrigation to six (6) acres of farmland. Other water uses include domestic for one home, stock water and fire protection.

Good Faith, Delay, or Speculative Information.

The applicant plans to divert water for its own use on the property that it owns. There are no known issues with any other party.

Financial Resources Information.

For this irrigation project the applicant has all equipment and supplies needed.

Local Public Interest.

The Northern Region has asked the Idaho Department of Fish & Game and Department of Environmental Quality for comments. Written comments received from these agencies indicate they are not opposed to the applicant's proposal and see no adverse impact to fish, wildlife, habitat or water quality.

Injury to Other Water Rights.

The source of water is the Clearwater River that has a minimum stream flow requirement. There does not appear to be any foreseen impacts to minimum stream flows based on the comments from the Idaho Department of Fish & Game and Department of Environmental Quality.

Recommendation.

The Northern Region recommends proceeding with the processing of this water right application.

Eric –

I have reviewed the attached application from Dahlquist to appropriate 38.6 AF/A to storage from several springs in Hubbard Gulch for stockwater, fire protection and back-up domestic use. I do not anticipate that the requested appropriation will have adverse impacts on fish, wildlife or habitat.

Please give me a call if you have any questions. Thanks for the opportunity to comment.

Subject: 86-12018 Dahlquist Application information

Good afternoon, John and Ray,

Attached is information regarding an application for John and Kelly Dahlquist for permit to appropriate water from springs in T36N R04W Sec.12, in the Salmon and Clearwater River Basins.

Please send your comments to Eric Davis on this as soon as you can review it. We're seeking your comments before this goes to publication in the Lewiston Tribune.

If you have any questions, please call Eric Davis at this office 208-762-2800, and/or e-mail him at eric.davis@idwr.idaho.gov.

Thank you for your early attention to this matter.

Subject: Application for Permit to Appropriate Waters of the State; #86-12018

Dear Mr. and Ms. Dahlquist:

We received a request for comment and a copy of your application for a water appropriation permit for 0.82 cubic feet per second, 38.60 acres-feet per year from 5 undeveloped springs located on property in Nez Perce County. The appropriated water will be directed into an established storage pond, with overflow returning to Howard Gulch. The request for appropriated water is for irrigation, domestic, stock water, and fire protection. Assuming all federal, state and local permits have been obtained, regulations met, and reviews completed, we offer the following comments.

Appropriation of the requested water must comply with applicable water quality standards (IDAPA 37.03.08.045.01.e.iii). The water requested for appropriation is included in Water body ID17060306CL065_02 and is currently listed in Section 3 of Idaho's Integrated Report as not assessed. There are no TMDL load or wasteload allocations immediately downstream that will be directly affected by the requested appropriation at this time. As per IDAPA 37.03.08.045.01.e.iii, we have determined this appropriation application does not conflict with applicable water quality standards.

Thank you for the opportunity to comment on your application. If you have any questions regarding the Idaho Water Quality Standards, please call us at (208) 799-4370.

Sincerely,

A handwritten signature in blue ink that reads "John Cardwell".
