Subject: pristine estimated discharges
Attachments: pristine 2002-2012.xlsx

Michele – Stu will be in to talk with you about running some numbers for the Pristine #3 hydro. Stu has 2008-2013 power generation records. I have estimated to the best of my ability estimated flow discharges from Pristine springs facility which would have been available at the #3 hydro for the period 2002-2012. There are a number of undocumented assumptions in this data (mostly the sunnybrook spring flows), but it will provide a basic trend line. You may come up with more or less flow, and I would not be terribly surprised. Use the column “Total Pristine Discharge”.

Also assumed is that the entire flow stream makes it to the hydro all the time, when in reality the formula is something like

(Alpheus used + Pristine Fresh + Spring flows + hot well) – (land application diversions 4cfs + stockwater diversions 1-2 cfs + domestic heating effluent .06 cfs + seepage and evaporation + hydro bypass?) = Hydro 3 flows

Just FYI on Dec 12, 2012 Stu and I used our Streampro ADCP and measured 177 cfs across the lower end of the lake, just above the power plant. The spreadsheet estimates 179 that day. So it may be closer than I think.

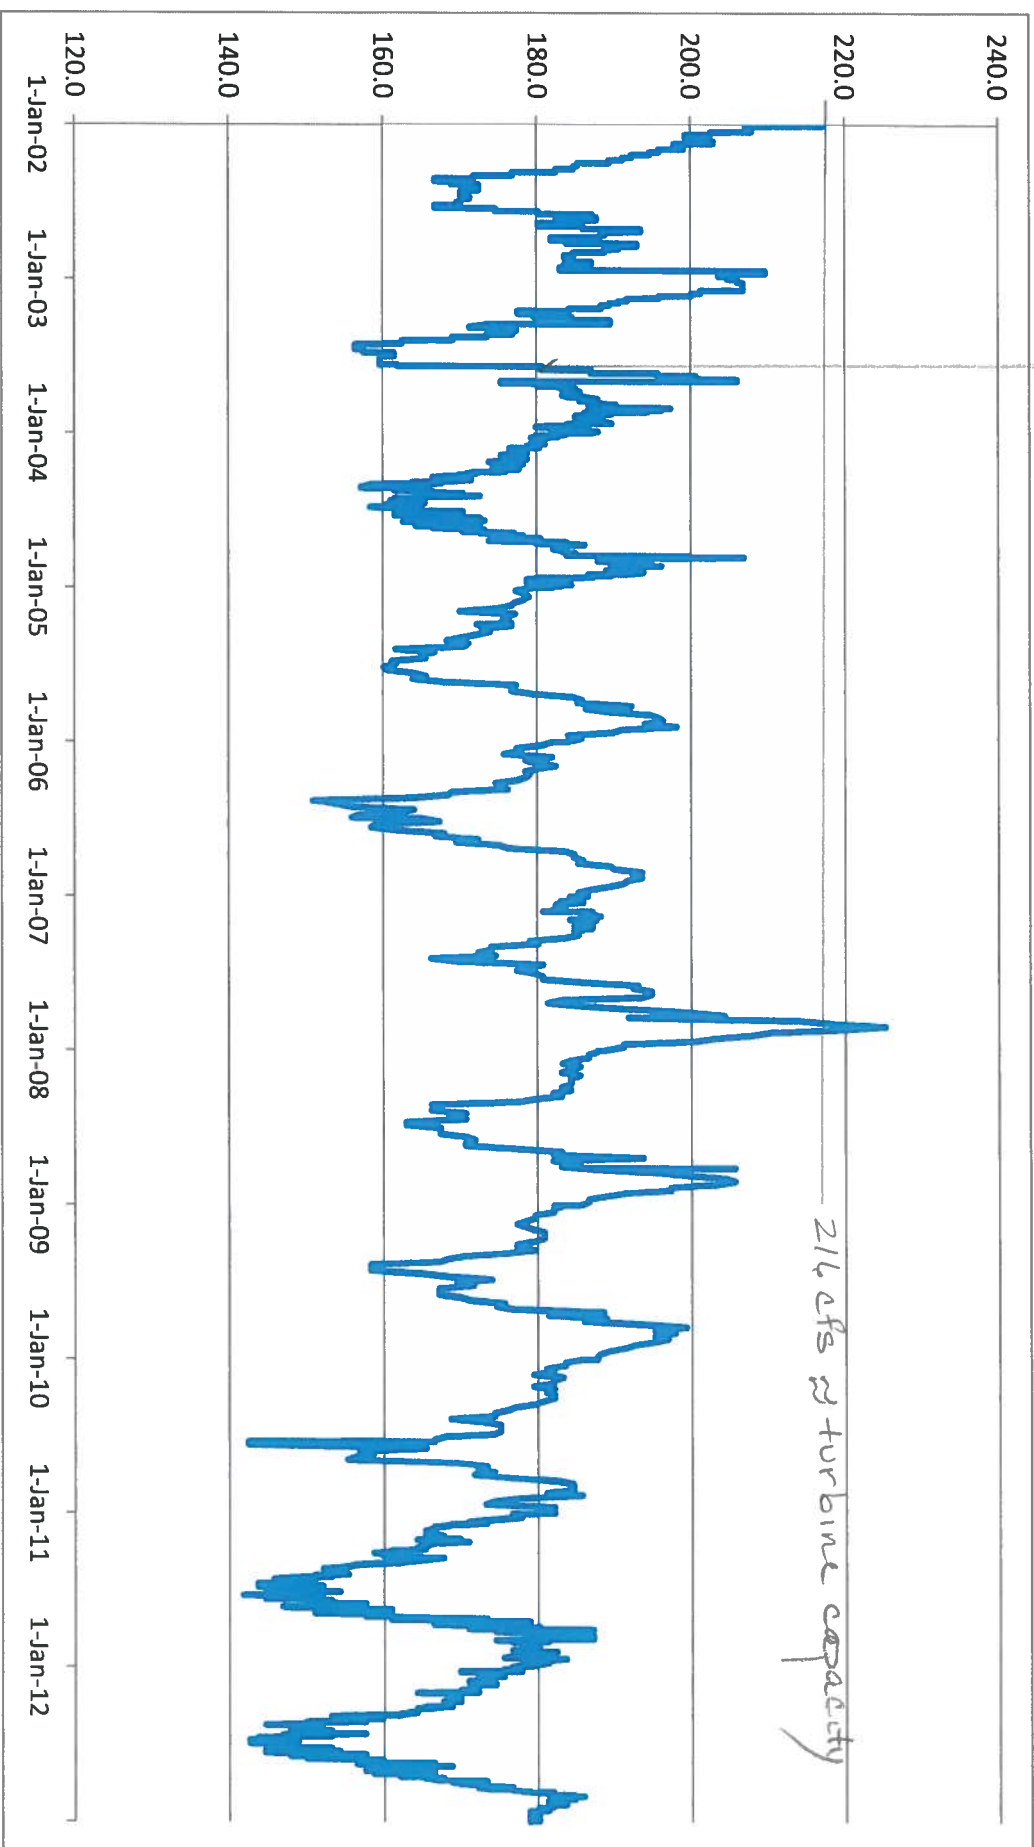

I think Stu is also going to also try and get some Snake River flow data for you in this same period, because you are going to find at least 2 different stage relationships at that turbine based on the river elevations.

If you can come up with some reasonable flow curves, we will then need to apply them to the power generation data during the hydro permit development period, 2002-2004. You have already kindly acquired this for me in Oct 2012. Your file name was “Pristine 3 KWH 2002-2005.xls”. If you don’t still have that I have at least the hard copy.

Have fun! Don’t be afraid to call if you have questions.

Cindy

August 2003

Subject: RE: Pristine #1 and #3 KWH Data for IDWR

Hi Michele,

Unfortunately, I do not have much detailed technical information about the Pristine #3 generator characteristics. There was a small paragraph in Appendix B that states it is a "hydro driven synchronous generator with a nameplate rating of 200 KW." I also found a note that the minimum capability is approximately 60 KW. I could not find any flow data or records of peak daily or hourly generation. It is my understanding that the meter is read at the start of each month and then they take the difference of the 2 meter readings to come up with the monthly KWH values.

Sorry I could not be of much help on this request.

Jerry

Mr. Jardine,

Do you have any other data for the lower plant? The Southern Region office and I have compared notes and so far the flow rate through that plant is unknown. The permit authorized as much as 240 cfs but I have no confirmation that that rate was ever achieved or, if it was, that the turbine could utilize it. I don't know the hydraulic capacity of the turbine.

The permit required a measuring device be installed and there is some evidence in the file that Brockway Engineering was attempting to develop a stage discharge relationship for the tailwater reach to satisfy that requirement. However, I find that that relationship does not appear to have been established and that it may not be possible given the tailwater's proximity to the river.

A turbine can be used as a measuring device. And with a little more information I can back-calculate a reasonable estimate of the flow rate. You may have records of the peak daily or hourly generation and the associated efficiency that would help me make that calculation. If not, I am no worse off from the asking.

Thank you again.

Subject: Pristine #1 and #3 KWH Data for IDWR

Hi Michele,

Attached are the KWH spreadsheets for Pristine Springs Hydro #1 (31415164) and Pristine Springs Hydro #3 (31415165) per your email request dated 9/25/12.

For Pristine Springs #1, I searched our records from 1992 to 1996 and there was no generation prior to 1995.

For Pristine Springs #3, I searched our records from 2002 to 2005 and there was no generation prior to 2003.

I hope this provides you with the a that you were looking for. If you have any other questions, please do not hesitate to contact me.

Best regards,

Jerry Jardine

Subject: generation data request

Mr. Stokes,

I have been assigned to assist with the licensing of two water right permits for hydro power use at Pristine Springs. This email is an informal request for your assistance in collecting historic generation data associated with those two permits.

Proof of Beneficial Use statements were received several years before the Idaho Water Resources Board took possession of the facilities. The Board has contemporary generation data but no data for the timeframe when these two water right permits were active.

I am required to issue licenses that portray the uses as they would have been developed by the "proof" date, but so far I have not been successful collecting the data I need from the previous owners. Mr. Gary Marquardt of SeaPac suggested that I contact Idaho Power.

I know that you are not the person to directly handle this data request and I am willing to direct a more formal request to that person. I hope that you will assist me by forwarding this message.

In brief, this is a request is for monthly generation data if it's available at that scale. The two projects are IPCo numbers **31415164** and **31415165**.

For the artesian, geothermal turbine. I am interested in data showing the generation between 1992-1995 or 1996. For the lower turbine on Warm Cr I am interested in data showing the generation between 2002-2004 or 2005.

Don't hesitate to call me at 287-4946. Thank you.

Sincerely,

Michele Edl
