Hey Jim,

I received the signed amendment for 37-8474 on November 1 (attached) but didn't receive the \$100 filing fee. I checked our receipt database and can't find evidence that we received payment. Could you check your records and if it was just an oversight, send in the \$100 fee with reference to Permit Amendment 37-8474?

Thanks,
Craig

Craig,

My client has signed the Application for Amendment and mailed it to me from Michigan. I will return it to you with the filing fee as soon as I receive it. Thank you for all your help on this one.

Jim

Hey Jim,

I ran in the meets and bounds description and Lot 5 does straddle the QQ line between the NWSW and the NESW. In order to include the NESW on the license, you will need to amend the permit. I have attached an amended permit for review. If it is acceptable with your clients, then we need it signed and returned with the \$100 filing fee.

The attached maps show the identified irrigated acreage within the subdivision. I followed the field examiners map as close as I could, but did end up with 0.5 acres of irrigation on each lot.

Take a look and let me know if you have any questions.

Thanks,
c

Craig,

Attached is the plat for the subdivision. Can you answer your question with this information? If not, we would have to hire a surveyor to find the line between those quarter-quarter sections.

Thanks.

Jim

Hey Jim,

With further review of the place of use for 37-8474, it is unclear if Lot 5 actually straddles the QQ line between the NWSW and the NESW. In the picture below you can see that yellow QQ line appears to split lot 5. But you can also see that the parcel data we have (green) appears shifted to some degree and doesn't really fit with the QQ lines.

In short, can you or your clients verify that lot 5 falls within the NWNSW and the NESW with a plat or deed with a meets-and-bounds description. If it does fall within both QQ's, then I think you might want to file an amendment to include the NESW as part of the POU for 37-8474.

Let me know what you think.

Thanks,

Craig

Craig,

This looks good. Thanks for getting right on this.

Jim

Hey Jim,

I have attached a draft corrected licensed for 37-8474. Changing the license to authorize domestic use for 5 homes alters the conditions, the diversion rate, and the volume. So I wanted to run it past you and see if this looks ok. The maximum diversion rate is still limited to 0.10 cfs which the examiner described as capacity of the system at the time.

This is consistent with the original license.

Let me know what you think.

Thanks,

Craig

Jim and Shelley,

I apologize for the delay in responding to the 8/15/2013 letter. I am in the process of preparing a response in the form of a preliminary order authorizing domestic use on the other 4 lots. I will try to have it ready for review this week. Early next week for sure.

Thanks,

Craig
