DEPARTMENT OF
WATER RESOURCES

10/8/2013

Dear Ms. Faureau,

I'm responding to your letter of 8/27/2013 regarding Water Appropriation Permit 875-7602.

We were overseas for most of October and I didn't open your letter until October 3rd, so I'm begging forgiveness in not responding within the 30 day time period as you demanded.

The subject well was probably drilled in the 1960^s at the same time the house was built. Joan and I bought this property in 1989 and the previous owner has moved on.

I will willingly provide the information I have, but several of the requests - I have no idea.

I've attached a photo of the pump well-head and its approximate coordinates are N 45° 8' 22.8" and E - 113° 54' 5.4"

The pump has never been pulled during our ownership of the property. I have no idea of its make, model, serial number, or horsepower.

I also have no information about the well logs, as the previous owner left me no information. I imagine the well is approximately 30 to 50' deep.

The well is hooked up to a sprinkler system that is 7 circuits each fed with a 1" line to approximately a dozen standard pop up heads. Pump run time depends upon weather conditions.

I'm sorry I don't have more information. Please feel free to come and inspect the system. I will make a point of being here with a little advanced notice.

Sincerely,
Robert Weirloo

75-7602
