Subject: Re: Regarding Water Permit 75-7602

Dear Danielle,

We use both the ditch and the well. The small ditch flows through the yard, and waters a portion of the property. However, it would be almost impossible to water the whole yard with just the ditch. The primary system for watering the lawn is the sprinkler system, which is hooked up the groundwater well. I use both the ditch, and the well: and do not wish to abandon either.

Thanks for your understanding.

Sincerely,

Robert Deurloo
