RE: Water Permit No. 13-7526

Dear Mr. Garner:

This is the third time this letter has been sent. The first two times (Oct 2012 and Feb 2013) the letters were sent to PO Box 57 in Clifton. Having received no response, I am now sending the letter to the address listed above in an attempt to generate a response. The department is currently reviewing Permit 13-7526 in preparation for issuing a water right license. By issuing a license, the Department confirms the extent of development that was established under the permit.

When I got back to the office and reviewed the GPS readings for the springs, I found that the actual location of the springs do not match the locations listed on the permit. I also found that the place of use description for the stockwater component of the right should be expanded to include the SWSE of Section 32. Please refer to the enclosed map. These changes can be easily accomplished through an Amendment of Permit for Licensing Purposes. Before a final water right license can be issued, your permit must be amended to depict your water use as it was actually developed.

The enclosed Application for Amendment form lists the elements of the water right as they will appear on the license when it is issued. I have also included a copy of my field exam for your reference. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it to me with the \$100.00 filing fee within 14 days. If I do not receive a response to this third mailing, I will assume that you are not interested in the water right license and will take steps to void the permit. Please feel free to contact me with any questions.

Sincerely,

A handwritten signature in dark ink, appearing to read 'J. Cefalo', is written over a horizontal line.

RE: Water Permit No. 13-7526

Dear Mr. Garner:

Thank you for meeting with me last month to show me the system developed under Permit 13-7526. Because so much of the system is underground, without your assistance I would not have been able to get the full picture of how water is conveyed across and used on the property. I am now reviewing the water permit in preparation for issuing a water right license. By issuing a license, the Department confirms the extent of development that was established under the permit.

When I got back to the office and reviewed my GPS readings for the springs, I found that the actual location of the springs does not match what was listed on the permit. I also found that the place of use description for the stockwater component of the right should be expanded to include the SWSE of Section 32. Please refer to the enclosed map. These changes can be easily accomplished through an Amendment of Permit for Licensing Purposes. Before a final water right license can be issued, your permit must be amended to depict your water use as it was actually developed.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. I have also included a copy of my field exam for your reference. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it to me with the \$100.00 filing fee within 14 days. If you have any questions, please feel free to contact me at (208) 525-7161.

Sincerely,

James Cefalo
