2. csaxton 10/23/2013 POD Location

Comment: POD location taken from USFS special use permit map.

3. csaxton 10/23/2013 POU Location

Comment: POU location verified from USFS special use permit. Actual POU is within the Gambler Placer Mining: Survey #3467. The location of the domestic structures seems to fall within the NENW of Section 1 despite that it was permitted for the NWNW of section 1. However, since the true legal description is Survey #3467, an amended claim is not required. The shape file linked to this right is not the entire Survey #3467. I cut out the section of Survey #3467 that contains the domestic structure and is within the NENW of section 1.

5. csaxton 10/23/2013 License Supersedes PD

Comment: This license supersedes the partial decree issued on September 11, 2000. The Final Unified Decree and Idaho Code allow IDWR to issue a license that is not otherwise in conformance with the permit-based partial decree. See Memo in file.

6. csaxton 10/23/2013 System

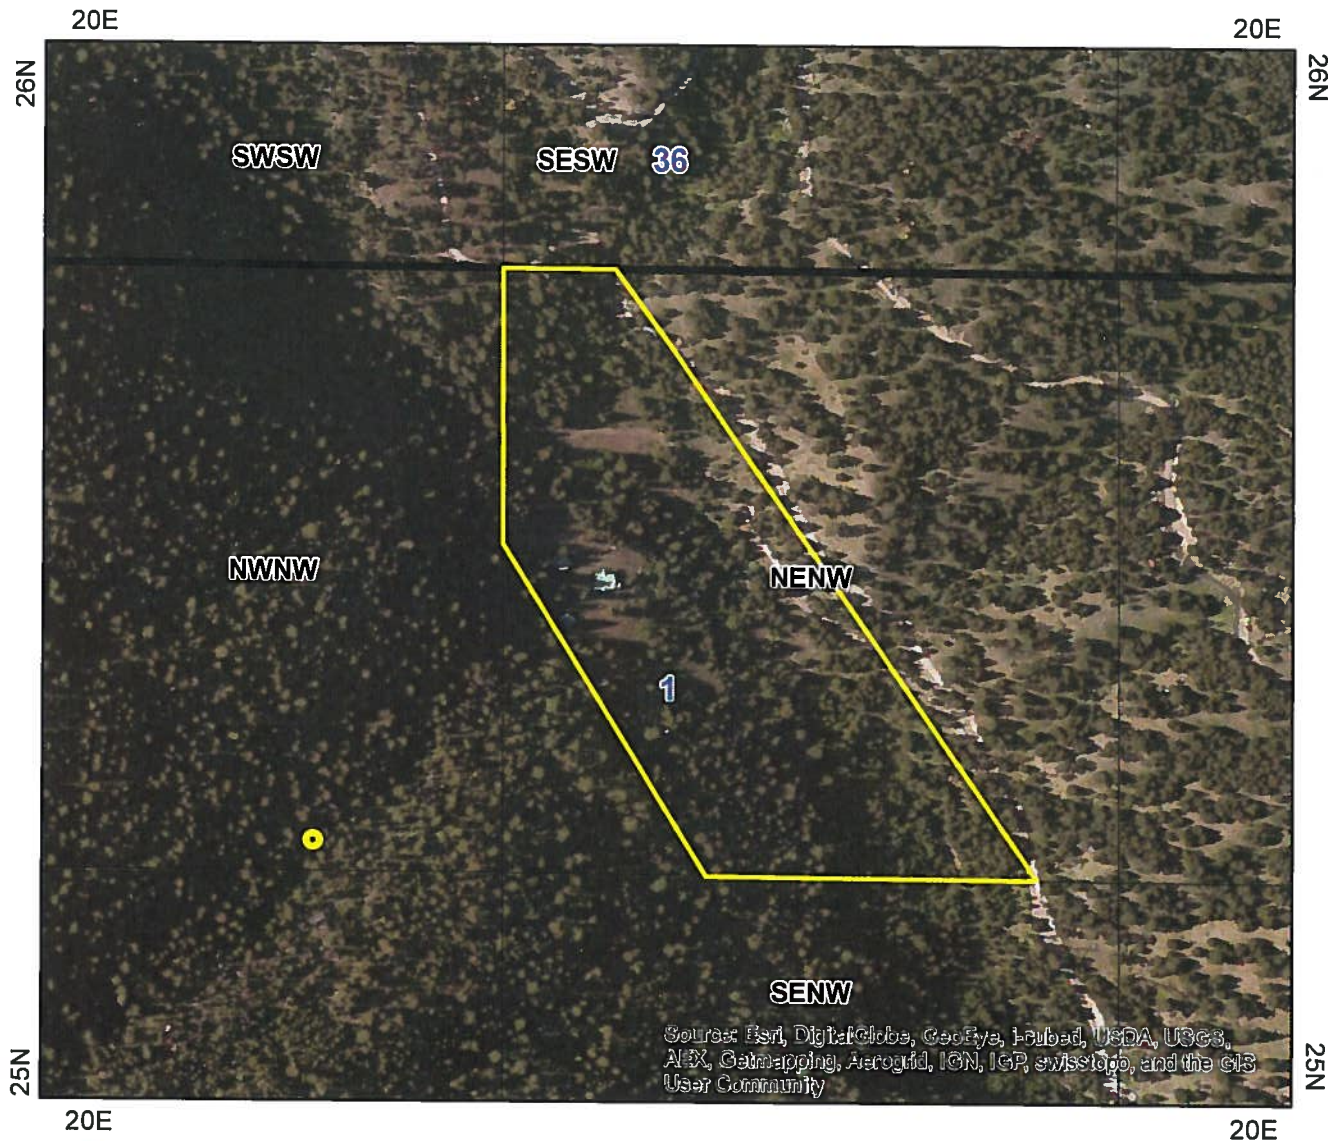

Comment: USFS Special Use Permit confirms diversion of water and describes delivery system. "...water collection system consisting of 3 foot in diameter "sink" that serves to collect water to fill a 7 ft x 4ft x 4 ft buried concrete cistern that holds approximately 750 gallons of water and 390 feet of buried 2 inch PVC pipeline. "

State of Idaho
Department of Water Resources

Reference Map: Place of Use and Point of Diversion
