RE: Additional Information Request

Dear Holzhausen:

I have been asked to review your file and do an in-house licensing exam on this water right. In order to properly review your file, I will need to attain some additional information. Once I receive this information, I will be able to formally address your letter dated July 12, 2013, and hopefully, we can issue the license on your water right. Please submit as much of the following information as you can:

1. We will need the Horsepower, make and the size of the discharge pipe from the well diverting water from the Snake River. If you have any pump curves or other data that will show the rate at which this pump operates, this information would be helpful.
2. We will need photos showing the pump, the land being irrigated, and the power panel if any.
3. We will need the number and size of the sprinklers you are using to irrigate your property. If you know the brand and/or model, please supply that information as well.
4. We will need to know the pressure that you operate your irrigation system if it is known. If you do not know the pressure of the system, please provide an estimate.
5. We will need you to clearly mark one or both of the enclosed maps the location of the point where you divert water from the Snake River (your pump location), the location of your pipelines and sprinklers, and the lands irrigated.

We would appreciate it if you could supply this information within the next 30 days. If you have any questions, please don't hesitate to contact me.

Respectfully,

Daniel A. Nelson

Staff Hydrologist
