72-16624

Darla,

I left a voice mail for you, but it was probably a little confusing. We are almost complete on this project, but are having some issues with getting the flow through the system. We should be complete in the next week or so, but if the problem persists we might need more time. Lets modify our "Request for Extension" for the full 5 years that is allowed, that way if we need more time trouble shooting our flow issues next spring/summer, we have it. Thanks.

Sincerely,

Jeri D'Orazio

Re: Request for Extension of Time filed on 08/22/2013 for Water Right Permit #72-16624

Dear Permit Holder(s):

The Department is in receipt of your request for extension of time requesting a (1) year extension of time for submitting proof of beneficial use on the above referenced water right permit. You are allowed an initial (5) year development period according to Idaho code. Between your permit and two of your approved extensions the initial (5) year development period is over. You are only allowed to file one more extension request after the initial (5) year development period for up to (5) more years.

If you would like your extension request form modified to reflect a (5) year extension request in lieu of a (1) year extension, the department could only make the change with a response from you requesting that your extension request form be modified to reflect the (5) year request.

If you decide to leave your extension request as a (1) year extension, this will be considered your last extension request allowed because you will have gone past the initial (5) year development period on this extension.

Please respond with the amount of time you prefer on the Request for Extension of Time form you have filed with the department.

Sincerely,

Darla Block
