Subject: Office Day Call

Hi Craig,

I received an office day call from a Sandra Haener. She received a letter from you concerning water right 84-12251, 84-12252, and 84-10636. I spoke with her and read the notes that you left on the water right, but I was not sure what your letter stated. From what I can tell from the water right notes, a transfer is needed to change the place of use and point of diversion, but I wasn't sure. I told her that she needed to call you, and she is planning on doing that Monday October 7th.

She is a bit upset, because she thought this had been taken care of by her attorney in 2007. I tried to calm her down, but I don't know if that worked. I thought I should give you a heads up.
