RE: Ownership of 84-10636

I spoke with Linda Moores on the phone on either Oct 7 or 8, 2013 regarding the September 16, 2013, letter I sent her.

The well or POD is on the Schulz property. Originally Don Imel developed the water right from a well that is located on Schulz' property which was used for a small domestic use that is on what is now Moore's property. Since then, the original domestic structure on Moores Property was removed and two new domestic structures were put in place (two cabins I think). There is also currently a modular home on Schulz property. The well serves all three domestic structures.

In response to the September 16 letter, Linda Moores thought she would file an application for permit for the two homes on her property.

Since the original home was on Moores property, Schultz will probably need to file a new application for permit for his more recent domestic development.

Linda contact Information is:

Moores15@q.com

Cell: 208.791.8766

Linda and I spoke about fees. When the change of ownership was filed in 2007, \$100 filing fee was paid and is recorded under receipt No. N018272. Ms. Moores said she might want to apply that fee to the new application for permit. I told her that for now I would hold off requesting a refund. Linda will need to either notify me to initiate a refund or file the request to apply the funds to the application when the new application is submitted.
