RE: Water Appropriation Permit 75-7603

Notice of Intent to Void Permit

Dear Permit Holders:

In 2006 IDWR issued permit 75-7603 authorizing the development of a right to divert 0.06 cfs of water from Twelve Mile Creek within SESE of Section 36, Township 20 North, Range 21 East, B.M., for irrigation use. On August 27, 2013, IDWR requested additional information from you in order to complete the licensing process.

At this time, IDWR has not received any additional follow-up information or contact regarding this permit.

You can request that IDWR personnel go into the field to collect this information accompanied by your or your representative. For this to occur, please contact IDWR with the name, telephone number, and email of your representative and the representative must be available to be contacted and scheduling of the required visit by no later than November 11, 2013. IDWR must also receive the contact information of your representative in a timely manner to perform the field examination by the November 11, 2013 deadline.

The final step in the water appropriation process is the issuance of a Water Right License. By issuing a license, IDWR recognizes that you have met the requirements for establishing a water right. If you have not developed a beneficial use of water from Twelve Mile Creek within the development period authorized by your permit a license cannot be issued. Once the development period authorized by your permit expires, your permit cannot be retained to cover future development of the resource.

If you believe a water right license should be issued to you, please supply information requested in the letter dated 08/27/2013 to demonstrate that you established a beneficial use of water in accordance with Permit 75-7603. If I do not receive the requested information or have been contacted by November 11, 2013, I will take action to void your permit under the provision of Section 42-219(8) of the Idaho Code. If you agree that no beneficial use of water occurred under permit 75-7603, you can shorten the voiding process by completing the enclosed relinquishment form and returning it to IDWR.

If you have any questions, please contact me at 208-287-4800.

Respectfully,

Danielle Favreau

RE: Water Appropriation Permit 75-7603

Request for Information

Dear Permit Holders:

In 2006 IDWR issued permit 75-7603 authorizing the development of a right to divert 0.06 cfs of water from Twelve Mile Creek within SESE of Section 36, Township 20 North, Range 21 East, B.M., for irrigation use.

The final step in the water appropriation process is the issuance of a Water Right License. By issuing a license, IDWR recognizes that water has been put to beneficial use in accordance with the permit. For your convenience, I am enclosing a copy of permit(s) listed above.

In an attempt to expedite the licensing process, IDWR would like for you to provide the following information regarding your permit:

Point of Diversion Information:	Photographs of the pump and the point of diversion. If pump is in a constructed ditch, the location of the point of diversion where the ditch leaves Twelve Mile Creek If possible, GPS coordinates of pump location – latitude/longitude.	
Pump Information:	Make, Model, Serial Number, and Horse Power of Pump or a picture of the pump plate	
Sprinkler Information:	Size of water line. Size, type, number of nozzles and gallon per minute of sprinklers.	

Permit 75-7603 includes the following conditions:

#2 Prior to the diversion and use of water under this approval, the right holder shall comply with all fish screening and/or fish passage requirements of the Idaho Department of Fish and Game.

#3 Prior to diversion of water under this right, the right holder shall install a lockable device, subject to the approval of the Department, in a manner that will provide the Watermaster suitable control of the diversion.

Photographs of:	The fish screen on the pump intake or other fish passage restriction device.	
	A lockable device attached to the diversion that will provide the Watermaster control of the diversion. If the pump is electric, a picture of the electrical box where a lock can be attached is acceptable.	

The photographs submitted should be of sufficient number and at sufficient angles in order to confirm compliance with the conditions listed on the permit.

In addition, I have enclosed a map of the identified Place of Use for Permit 75-7603. Based on the map provided and the 2011 NAIP imagery, 1.6 acres of irrigation have been identified. If additional acreage is being irrigated, please indicate where on the provided map and photographs of the additional irrigated acres. Please note that impermeable surfaces such as homes and driveways cannot be included in the irrigated acreage.

Please provide the requested information within the next thirty (30) days. If I do not receive the requested information or have been contacted by you within thirty (30) days, I will take action to void your permit under the provision of Section 42-219(8) of the Idaho Code.

If you have any questions, please contact me at 208-287-4938. Thank you for your attention to this matter.

Respectfully,

A handwritten signature in black ink, appearing to read "Danielle Favreau", with a stylized flourish at the end.
